Non-Technical Summary

Ringway Jacobs operates Wardle depot as part of the maintenance contract for Cheshire East Council. As a function of the maintenance contract, part of the depot will be used for the transfer of waste generated through delivery of the contract. Site activities involve the transfer of waste to and from site, and the dewatering of street cleansing residues EWC 20 03 03, within two dedicated dewatering bays.

Wastes are stored in dedicated waste bays from which fugitive emissions are controlled, prior to collection by appropriately permitted third party contractors for off-site recycling, recovery, or disposal as appropriate.

Ringway Jacobs Limited is accredited to ISO 14001 and operates as a service provider that maintains local highways including treatment for street cleaning residues collected from gulley emptying and street cleaning, carriageway and footway works and street lighting.

Ringway Jacobs continually strive to reduce our environmental impact and improve our current systems to ensure the waste at site is compliant under our permit conditions.
