Introductory note

This introductory note does not form a part of the notice.

The following notice gives notice of the variation of an environmental permit.

This variation introduces the registration of the Magnox Swarf Storage Silo Retrievals Ventilation System stub stack, the registration of an Outfall X to discharge construction related aqueous waste arisings (non-sewage trade waste) to the River Calder via surface water drainage, the removal of the Gaseous Annual Site Limits for Krypton-85 & Antimony-125 following the completion of Magnox reprocessing in July 2022, a change to the site map and a reduction to the Radium-226 limit in response to Sellafield Ltd.'s application to extend the Calder Landfill Extension Segregated Area (CLESA) environmental safety case into the 'valley area', and changes to the Aqueous Plant Notification Levels.

The Schedules specify the changes made to the permit. A consolidated environmental permit, reflecting the changes made to the permit, has been issued.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
