Budget Waste Management Limited (BWM)

# Normal Variation Application to Consolidate Environmental Permits
## EPR/KB3233RW & EAWML/48187

The purpose of this application is to consolidate the two permits SR2008No7 75kte (EPR/KB3233RW) and EAWML/48187 (bespoke permit) into one bespoke permit which will be a variation of the existing permit EAWML/48187. This will include the waste types, waste quantities and waste operations included in both of the permits. We have also included in the application that the existing S2 exemption waste types and storage conditions are to be included in the bespoke permit. The only change of activity that is proposed as part of the variation is that the waste wood is to be stored and treated outside. A risk assessment is provided to accompany this change.
