

Jameson Road Landfill Site Community Update

Month	Number of reports	Types of report
May	525	Mainly Odour
June	171	Mainly Odour
July	245	Mainly Odour

Current Situation

We are still receiving odour complaints from affected members of the community and whilst we believe that compliance with the notice will significantly reduce the risk of odour impacts (potential intensity and duration) on the local community, we understand there are still odours being detected. Some of these are in the early hours of the morning.

We are requiring Transwaste to identify and reduce these odour sources. We continue to maintain a community presence and, if appropriate, will consider further enforcement actions.

Regulatory enforcement

In recent updates, we stated that we had not lifted the suspension notice at the Jameson Road site. **The landfill permit still remains suspended** for the acceptance of anything other than inert waste.

We met with Transwaste this week to understand exactly where they are up to on site. They believe that they have completed the actions required to satisfy the steps within the notice.

We will not lift the suspension until the works meet our satisfaction and modern landfill standards. We will continue frequent inspections and drone flights to ensure this is the case. This includes overnight odour assessments over the next few days.

Next Steps

We will be having further discussions with Transwaste to clearly understand their future intentions for the site, hold them to account for their future operations and provide assurance that the impact of their business operations on the community are better managed.

This will include auditing and inspections of the operations and in particular -

- the landfill gas management,
- leachate management,
- waste acceptance procedures.

We will also place a high level of scrutiny on the engineering, construction and operation in the newest landfill cell.

Compliance Assessment Forms

Members of the public have previously requested copies of our compliance assessments at the site. We promised to release them as soon as we were able to.

We are currently in the process of placing a number of those compliance reports on the Jameson Road website at [Information on Jameson Road Landfill Site, Fleetwood, Lancashire - Environment Agency - Citizen Space \(environment-agency.gov.uk\)](https://www.environment-agency.gov.uk/citizen-space/landfill-sites/jameson-road-landfill-site-fleetwood-lancashire).

As the regulation and investigation is still current, we will not be able to answer direct questions about the content of the reports. We will attend the next community liaison group meeting where we can update representatives from the community.
