

Jameson Road Landfill Site

Since our last update on 15 March we have received more reports from members of the community around Fleetwood.

Month	Number of reports	Types of report
January	5	Odour
February	75	Odour
March (to date)	1075	Odour

Current Situation

Since our last update, our regulatory officers have been visiting the site weekly carrying out odour runs and assessments. We have deployed our drone to provide an overview of the activity and potential progress being made with engineering and any measures being taken to better manage odour from the site.

On 18 March we issued a notice to stop the use of a ‘tipping bay’ which has been a source of offsite odour. The operator has complied and stopped using this bay. They are now tipping directly into the landfill cell and at a reduced rate of waste input, subsequently the notice was withdrawn on 20 March.

Work has been carried out on site this week to install infrastructure to manage the gas, including the drilling of 6 new gas wells which are being connected to the management system. Once connected it will take a couple of days for the gas levels to settle - we expect this will go some way to improving the situation.

We remain committed to ensuring that Transwaste are doing everything they can to fix the problem as soon as possible.

How are we keeping the community updated?

We have set up a web page to keep the community informed which will be updated regularly. All updates in relation the current situation are available here:

[Information on Jameson Road Landfill Site, Fleetwood, Lancashire - Environment Agency - Citizen Space \(environment-agency.gov.uk\)](https://www.environment-agency.gov.uk/citizen-space/jameson-road-landfill-site-fleetwood-lancashire)

We will continue to provide these updates as the situation changes. If you would like to be added to the mailing list to receive them directly then please send an email to:

engagement.cmlnc@environment-agency.gov.uk

Reporting the odour

Reporting helps us to build up a picture of the extent and impact of the odour issue within the community. We encourage people to report to us on our 24-hour incident hotline:

0800 807060

customer service line 03708 506 506

incident hotline 0800 80 70 60

floodline 03459 88 11 88
