

TEAM2100

Canvey Island - Southern Shoreline Revetment Project Newsletter

Issue 6: 15 June 2023

Welcome!

Welcome to the sixth edition of the newsletter for the Canvey Island Southern Shoreline Project.

In this edition we meet the local recruits to the project, take a look at the project's progress and look at the recent actions we have taken in the local community as a result of your feedback.

On page three of this edition, you will find planned working hours for the shoreline revetment replacement works, their location and the compounds used.

If you would like copies of future newsletter editions, please email: TEAM2100canveyrevetment@jacobs.com

Do you have a question?

If you would like to ask the project team a question, we hold a weekly drop-in session.

The session is currently taking place at Sue's Café on Wednesdays from 11am-1pm while we prepare a new premises.

Local recruits to the project

The project has a growing number of team members who have been recruited from the local community.

The local recruits hold a variety of roles on the project. These include office manager, lift supervisors and plant operators recruited by Balfour Beatty, and members of the supply chain who have been recruited by J Coffey.

All of the local recruits live on Canvey Island.

Progress from site

Since we last updated you, we have:

- Continued to place Open Stone Asphalt (OSA) and Lean Sand Asphalt (LSA) in the Thorney Bay area.
- Continued to construct the access road at the top of the embankment at Leigh Beck.
- Made good progress on the eastern end of the island at compound 4 where preparatory works for the laying of the revetment are taking place.

In the next few weeks we will:

- Continue preparatory works to lay OSA and LSA at Thorney Bay.
- Commence installation of the first set of precast concrete steps at Thorney Bay.
- Breakout the existing ramp at Fisherman's Corner in preparation for the construction of the new wider access ramp.

Community drop-in: a big thank you

A big thank you to everyone who attended the drop-in session held at Canvey Football Club on 25 May.

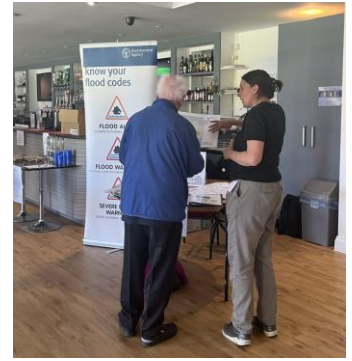

The session was well-attended and it offered the community the chance to find out more about the project and ask the project team questions. Some of the comments received by those who attended were:

"I am up-to-date with the reason for the work, it was good to see the progress so far."

"It was very helpful in explaining the work that is being carried out and how it is to be done, construction-wise."

There were also comments from those who attended the session around holding more drop-in sessions in the future.

We will organise a further session later this year and more detail will be released via these newsletters as well as social media and other means.

Visitors and staff at the drop-in

Project webpage

If you want to keep up-to-date on the latest from the project, check out the dedicated webpage.

It has the latest news, project timings, compounds information and a list of frequently asked questions.

The webpage also features the latest information on footpath diversions and the environmental assessment report for the project.

There is also video which provides a computer simulated representation of the details and key aspects of the project, comparing with the existing site at certain locations along the frontage. You can visit the site here: <https://consult.environment-agency.gov.uk/east-anglia-c-e/canvey-southern-shoreline-project/>

Working with the community

A few weeks ago, we received a request from Castle Point Borough Council to relocate a dog waste bin that was located behind the Bay Café.

The bin had been fenced off as a result of our works that are taking place in the area and could therefore not be used by members of the community.

As a result of the request from the council, our team has now relocated the bin to the car park next to the Bay Café for dog walkers to use.

Planned working hours

Please find below the planned working hours, locations and the compounds used. This will also involve operations on the landward side of the defence to support movement of materials. **Key:** **NCH** - Normal Construction Hours (08:00 to 18:00), **NWD** - Non Working Day (Weekends and Bank Holidays), **SC1** - **Satellite Compound 1**, Fisherman's Corner, Western Esplanade, SS8 0AY, **Main Compound** - Adjacent 287 Eastern Esplanade, SS8 7PQ, **SC4** - **Satellite Compound 4**, B17 Memorial Ground, Beveland Road, SS8 7QT.
