

# Coggeshall, Feering & Kelvedon Flood Alleviation Scheme Phasing the Quarrying Operations Across the Off Line Flood Storage Area

The Off Line Flood Storage Area will be created by Blackwater Aggregates' quarrying operations and carried out in four main phases. Each phase worked over a period of approximately five years and the On Line Dam will be constructed in Year 6. Works will progress in an easterly direction, views from Coggeshall will be screened by unexcavated phases and perimeter screening mounds.

Phase A	Phase B	Phase C	Phase D
Years 1 to 5	Years 6 to 10 On Line Dam Constructed Year 6	Years 11 to 15	Years 16 to 20
Restoration Years 2 to 7	Restoration Years 7 to 12	Restoration Years 12 to 17	Restoration Years 17 to 22
