Lowdham Flood Storage Reservoir Construction Update

Dear Lowdham Resident,

We have previously communicated that the project's estimated completion date would be in the Spring of 2026. Regrettably, we foresee delays to the project programme which will push back the completion date to approximately January 2027.

We are aware and appreciate that many of you are eager for the scheme to be completed as soon as possible and we apologise if this causes any further concern.

Schemes such as Lowdham are very complex and need the involvement of many organisations, individual bodies, landowners and permits required to complete the project. We are working very closely with all our partners to bring forward the programme as much as we can. One of the most immediate actions is the 10-week road closure of Lambley Road, which is planned to commence in mid July 24.

If you have any further questions or queries, please do not hesitate to get in contact via our project email address LowdhamFSR@environment-agency.gov.uk and stay updated on our [Facebook page](#).

Kind Regards,

The Project Team
