“BAT reference document” and “BAT Associated Emissions Performance Level” have the meanings given in the Industrial Emissions Directive;

“default standard facility” means a standard facility described in standard rules made after 1st April 2018;

“NECD substance” means oxides of nitrogen, sulphur dioxide, fine particulates (PM10s used as an indicator for PM2.5s), ammonia, and non-methane volatile organic compounds;

“NMP” means noise management plan;

“OMP” means odour management plan;

“Pollution Inventory reporting thresholds” means the thresholds with that title published on Gov.UK;

“standard facility” means a regulated facility described in standard rules published under regulation 26 of the Regulations, and which is the subject of –

- (a) a request from the operator made under, or
- (b) a term referred to in, regulation 27(2) of the Regulations.
