

4.9.13 Installations: Mining Waste Sector

The proposed permit categories and baseline charges for the mining waste sector can be found in the tables of charges in the schedule to the charging scheme. Charges relating to permitting applications are in Part 1.11 of the application charges table; annual compliance charges are found in Part 2.11 of the subsistence charges table.

We are proposing no significant shift in the way we regulate sites in this sector.

Annual charges rise as we move to more accurately reflect the costs of our regulatory activities.
