

FCERM 2050 Ambition Working Group

What will flood and coastal erosion risk management look like in 2050?

This group will set out the 25 year ambition for the FCERM Strategy, considering what flood and coastal erosion risk management will look like in 2050.

Working group timeline

This group will meet initially on Wednesday 23 May, with further meetings held monthly over the summer. It will build on the work started by the scoping group to develop a working ambition. The development of the ambition will inform the four other working groups to assist with their generation of ideas that will form the Strategy. The ambition will be reviewed and refined over summer as the other working groups develop the content that will feed into the Strategy.

Initial questions to consider

- ➔ What will the values and principles of the flood family be in 2050?
- ➔ How do we want the landscape of flood and coastal erosion risk management to look in 2050?
- ➔ How will the flood family develop to enable us to reach our objectives in 2050?

Anchor points

Core question	What's not within our gift?		
	Legislation, policy, fact	Principles, values	
What do we all want to protect and how collectively can we fund it?	<ul style="list-style-type: none"> Partnership funding policy Environment Agency/Government make funding decisions supported by RFCC We cannot stop all flooding & there are some places we cannot protect 	<ul style="list-style-type: none"> We take account of future climate change We protect those at highest risk We expect & support resilience We provide an 'emergency service' 	What opportunities are there?
How can we all put water at the heart of everyone's decision making?	<ul style="list-style-type: none"> National planning policy & housing targets Some properties will be built at risk in the future 	<ul style="list-style-type: none"> We want water to be considered early in plans Water should not be a constraint We want to develop better places for people & the environment 	
What part do individuals, communities and businesses play?	<ul style="list-style-type: none"> Statutory roles & responsibilities around flood and coastal erosion risk management Environment Agency/ Government make scheme decisions Communities have different capacity / desire to be involved 	<ul style="list-style-type: none"> Clear, open information & data – shared freely between organisations and the public We want to work in a way that allows communities to be part of the team 	
How do we develop the current roles and responsibilities of professional partners to be effective, simple and clear?	<ul style="list-style-type: none"> Statutory roles & responsibilities around flood and coastal erosion risk management There are those with vital roles which are not statutory Not everyone will have the funding they need 	<ul style="list-style-type: none"> We want everyone to be clear on their role & their part in the mosaic We all need to play our part & be held to account We need to develop, maintain & share skills & capability
