If the Total No Breaches is greater than zero, then please see Section 3 for details of our proposed enforcement response

Section 2 – Compliance Assessment Report Detail

This section contains a report of our findings and will usually include information on:

- the part(s) of the permit that were assessed (e.g. maintenance, training, combustion plant, etc)
- where the type of assessment was 'Data Review' details of the report/results triggering the assessment
- > any non-compliances identified
- > any non-compliances with directly applicable legislation
- details of any multiple non-compliances
- information on the compliance score accrued inc. details of suspended or consolidated scores.
- details of advice given
- > any other areas of concern
- all actions requested
- > any examples of good practice.
- > a reference to photos taken

This report should be clear, comprehensive, unambiguous and normally completed within 14 days of an assessment.

This CAR form summarises our review of the operator's response to Pre-Operational Condition 11 (PO11) in Table S1.3 of their environmental permit. The purpose of this pre-operational condition is to ensure that there is no flooding caused to Carr Bridge Brook or Ribble Main Drain. The condition sets various requirements which the operator must demonstrate they have met (including data collection, surveys, modelling and the development of a procedure) before they can discharge surface water into Carr Bridge Brook.

The operator submitted 'Preston New Road Water Study – Hydraulic Modelling and Discharge Protocol' on 14 March 2019. This report describes data collection through surveying and water level monitoring, hydraulic modelling, analysis of the data/modelling results and the protocol for discharging surface water from the site.

The report was reviewed by surveying, modelling and regulatory specialists in the Environment Agency and we are satisfied that the operator has met the requirements of PO11 and we approve the report.

The operator conducted a walkover study and topographical survey of the accessible sections of the Ribble Main Drain and Carr Bridge Brook. LIDAR data was used to verify this information and provide levels for those areas where landowner access could not be gained.

Through these surveys a culvert over Carr Bridge Brook at Moss House Lane was identified that may constrict flow. The dimensions of the culvert were considered by the hydraulic model. The area immediately upstream of the culvert is most critical as it would be the first area to overtop in a flood. Given this, Cuadrilla have completed a full analysis and built this in to their procedures which manage discharge from the site to prevent flooding.

A water level gauge was installed on Main Drain which provided a baseline assessment of water levels. This data was fed into the hydraulic model.

A hydraulic model was produced based on the surveyed levels/cross sections, baseline data and estimated water flows for the catchment from rain gauge data. Various additional flows from the proposed site surface water discharge were considered.

An operational protocol for surface water discharge from the site was produced by Cuadrilla. This protocol includes discharging actions which take into account the measured water levels recorded by a water level gauge on Carr Bridge Brook. The modelling demonstrates that first flooding appears to occur just upstream of the culvert under Moss House Lane. Cuadrilla's operational protocol sets out that they will monitor the water level at this point and only discharge to Carr Bridge Brook when water levels are low enough to prevent flooding. The operational protocol also includes a flow rate that surface water can be discharged from the site. A commissioning process was also provided.

The threshold level for commencing discharge is <3.30 mAOD (measured by a water level gauge on Carr Bridge Brook) and the level for stopping discharge is 3.50 mAOD.

Environment Agency	EPR Compliance Assessment Report	Report ID: UP3431VF/0333335				
This form will report compliance with your permit as determined by an Environment Agency officer						
Site	Preston New Road Exploration Site EPR/AB3101MW	Permit	UP3431VF			
Operator/ Permit	Cuadrilla Bowland Limited	Date	07/06/2019			
Section 3- Enforcement Response Only one of the boxes below should be ticked You must take immediate action to rectify any non-compliance and prevent repetition. Non-compliance with your permit conditions constitutes an offence and can result in criminal prosecutions and/or suspension or revocation of a permit. Please read the detailed assessment in Section 2 and the steps you need to take in Section 4 below.						
Other than the provision of advice and guidance, at present we do not intend to take further enforcement action in respect of the non-compliance identified above. This does not preclude us from taking enforcement action if further relevant information comes to light or advice isn't followed.						
In respect of the above non-compliance you have been issued with a warning. At present we do not intend to take further enforcement action. This does not preclude us from taking additional enforcement action if further relevant information comes to light or offences continue.						
We will now consider what enforcement action is appropriate and notify you, referencing this form.						

Section 4- Action(s)					
Where non-compliance has been detected and an enforcement response has been selected above, this section summarises the					
steps you need to take to return to compliance and also provides timescales for this to be done.					
Criteria Ref.	CCS Category	Action Required / Advised	Due Date		
See Section 1 above					

Section 5 - Compliance notes for the Operator

To ensure you correct actual or potential non-compliance we may

- advise on corrective actions verbally or in writing
- require you to take specific actions in writing
- issue a notice

• require you to review your procedures or management system

- change some of the conditions of your permit
- decide to undertake a full review of your permit

Any breach of a permit condition is an offence and we may take legal action against you.

• We will normally provide advice and guidance to assist you to come back into compliance either after an offence is committed or where we consider that an offence is likely to be committed. This is without prejudice to any other enforcement response that we consider may be required.

• Enforcement action can include the issue of a formal caution, prosecution, the service of a notice and or suspension or revocation of the permit.

• A civil sanction Enforcement Undertaking (EU) offer may also be available to you as an alternative enforcement response for this/these offence(s).

See our Enforcement and Civil Sanctions guidance for further information

This report does not relieve the site operator of the responsibility to

• ensure you comply with the conditions of the permit at all times and prevent pollution of the environment

• ensure you comply with other legislative provisions which may apply.

Non-compliance scores and categories

CCS category	Description	Score		
C1	A non-compliance which could have a major environmental effect	60		
C2	A non-compliance which could have a significant environmental effect	31		
C3	A non-compliance which could have a minor environmental effect	4		
C4	A non-compliance which has no potential environmental effect	0.1		

<u>Operational Risk Appraisal</u> (Opra) - Compliance assessment findings may affect your Opra score and/or your charges. This score influences the resource we use to assess permit compliance.

Section 6 – General Information

Data protection notice

The information on this form will be processed by the Environment Agency to fulfill its regulatory and monitoring functions and to maintain the relevant public register(s). The Environment Agency may also use and/or disclose it in connection with:

• offering/providing you with its literature/services relating to environmental matters

• consulting with the public, public bodies and other organisations (e.g. Health and Safety Executive, local authorities) on environmental issues

- carrying out statistical analysis, research and development on environmental issues
- providing public register information to enquirers
- investigating possible breaches of environmental law and taking any resulting action
- preventing breaches of environmental law
- assessing customer service satisfaction and improving its service
- Freedom of Information Act/Environmental Information Regulations request.

The Environment Agency may pass it on to its agents/representatives to do these things on its behalf. You should ensure that any persons named on this form are informed of the contents of this data protection notice.

Disclosure of information

The Environment Agency will provide a copy of this report to the public register(s). However, if you consider that any information contained in this report should not be released to the public register(s) on the grounds of commercial confidentiality, you must write to your local area office within 28 days of receipt of this form indicating which information it concerns and why it should not be released, giving your reasons in full.

Customer charter

What can I do if I disagree with this compliance assessment report?

If you are unable to resolve the issue with your site officer, you should firstly discuss the matter with the officer's line managers. If you wish to raise your dispute further through our official Complaints and Commendations procedure, phone our general enquiry number 03708 506 506 (Mon to Fri 08.00–18.00) and ask for the Customer Contact team or send an email to <u>enquiries@environment-agency.gov.uk</u>. If you are still dissatisfied, you can make a complaint to the Ombudsman. For advice on how to complain to the <u>Parliamentary and Health Service Ombudsman</u> phone their helpline on 0345 015 4033.
