

West Veiw, Tewitt Hill, Lower Edge Farms

The installation at West Veiw, Tewitt Hill, Lower Edge Farms will be able to meet all the new relevant BAT conclusions along with the new BAT AEL's.

A nutritional strategy will be employed reducing the levels of N and P

This will be verified by means of manure analysis and reported annually along with dust emissions based on the standard emission factor for free range layers.

NH₃ emissions will be calculated using the standard emission factors and reported annually.

On a daily basis, odour levels at the installation will be monitored for high housekeeping odours. OMP amended accordingly.
