APPENDICES

Appendix A	Permitted Waste Types
Appendix B	Waste Storage Details

1 INTRODUCTION

1.1 Operational Hours

- 1.1.1 The operational hours of the site are detailed within the Planning Permission and all specified waste management activities will be undertaken within the hours specified including restrictions on hours for loading/unloading and movement of wastes.
- 1.1.2 The site is operational on bank holidays excluding 25th December, 26th December and 1st January.

1.2 Permitted Activities

- 1.2.1 The site holds an Environmental Permit (permit) with the reference EPR/EB3708UG. The site operates as a household, commercial and Industrial (HCI) waste transfer station, including the acceptance of hazardous waste.
- 1.2.2 This document has been updated in support of a variation to the site's permit. The site has historically operated under Standard Rules SR2008 No.7 (EPR/EB3708UG) supported by an S2 exemption, allowing external storage of batteries, WEEE, tyres, wood, UPVC, scrap metal, glass and cardboard. The varied bespoke waste operations permit will integrate the S2 activities, allow for the acceptance of vapes and e-liquid at the site and the acceptance of hazardous and non-hazardous waste streams collected from industrial and commercial (I&C) customers by SUEZ's adjacent depot.
- 1.2.3 The waste types accepted at the site comprise non-hazardous household, commercial and industrial wastes, mainly comprising waste, dry mixed recyclables (DMR), cardboard, wood, glass and metal. Hazardous waste streams accepted at the site from HCI sources include small and large WEEE, vapes and e-liquids, fluorescent tubes, fridges and batteries. The site also accepts varied single stream hazardous and non-hazardous collected from I&C customers with sources including but not limited to garages, marinas, workshops, and dental practices
- 1.2.4 The waste types permitted to be accepted at the site are detailed in Appendix A.
- 1.2.5 The maximum permitted annual tonnage of waste accepted at the site shall not exceed 75,000 tonnes.
- 1.2.6 The D and R activity codes that will be carried out on site are detailed below.

Table 1: D&R Codes

D9	Physico-chemical treatment not specified elsewhere in Annex IIA which results in final compounds or mixtures which are discarded by means of any of the operations numbered D1 to D8 and D10 to D12
D13	D 13 Blending or mixing prior to submission to any of the operations numbered D 1 to D 12 [**]
D14	Repackaging prior to submission to any of the operations numbered D1 to 13
D15	Storage pending any of the operations numbered D1 to D14 (excluding temporary storage, pending collection, on the site where it is produced)

R3	Recycling/reclamation of organic substances which are not used as solvents
R4	Recycling/reclamation of metals and metal compounds
R5	Recycling/reclamation of other inorganic materials
R12	R 12 Exchange of waste for submission to any of the operations numbered R 1 to R 11 [****]
R13	Storage of wastes pending any of the operations numbered R1 to R12 (excluding temporary storage, pending collection, on the site where it is produced)

2 OPERATIONS

2.1 Activities & Processes

2.1.1 The following activities and processes can be carried out at the facility:

- Waste acceptance
- Unloading waste
- Manual sorting and separation of waste
- Storing waste
- Waste repackaging
- Loading and unloading waste containers
- Loading waste
- Empty bin and container storage
- Mechanical treatment

2.2 Waste Acceptance and Pre-acceptance

2.2.1 Waste acceptance, rejection and dispatch procedures are detailed in IMS - Duty of Care. Procedures associated with hazardous waste are detailed in IMS – Hazardous Waste.

2.2.2 In addition to the waste acceptance procedures, an evaluation of the incoming waste is undertaken at the weighbridge to ensure effective waste handling and storage management to prevent any potential amenity effects which can at times be at greater risk due to seasonal fluctuation (for example the potential for malodorous waste and fly infestation).

2.2.3 Hazardous and chemical wastes accepted at the facility are subject to a prior pre-acceptance evaluation process. Wastes are assessed and classified separately before collections are undertaken and wastes are accepted on to site. Customers are asked to provide details of the waste type and safety datasheet, where necessary, to ensure the waste is correctly characterised and can be accepted at the site.

2.2.4 To ensure chemical waste is safe to be received at the site, SUEZ's site chemist will provide the customer with training (toolbox talk) on categorising the waste and preparing them for transport during contract set-up.

2.2.5 Any non-conforming loads will either be rejected from the site and redirected to an appropriate permitted facility or placed in quarantine prior to removal site. A record of this will be made in the site diary.

2.3 Unloading Waste

2.3.1 Waste is unloaded in three distinct areas; the transfer station building, the external storage bays and the external hazardous waste storage area. Visiting traffic for all areas is directed by weighbridge staff.

2.3.2 All areas internal and external to the site which are used by visiting traffic are constructed from hardstanding surfaces so generation of mud on external highways and roads from activities on site is considered to be low risk.

-
- 2.3.3 Traffic flows in a one-way system around the site. Vehicle flows are controlled by the weighbridge operator and site staff.
 - 2.3.4 Vehicles are directed to the appropriate tipping bay within the transfer station building (or external bays/ storage areas) depending on the waste that they are carrying.
 - 2.3.5 Access to the reception hall will be suspended when the number of vehicles in the reception hall is at full capacity.
 - 2.3.6 Hazardous waste is manually unloaded to minimize the risk of puncturing, spilling, or compromising containment systems.
 - 2.3.7 Visiting drivers are required to inspect their vehicles before exiting the transfer station to ensure there is no debris on the wheels, nuts or other parts of the vehicle.
 - 2.3.8 Daily inspections of the reception hall and external areas are undertaken to check for leaks & spillages to ensure that all litter and dust/particulate matter generated from activities are contained within the reception hall.

2.4 Waste Treatment

Mechanical Treatment

- 2.4.1 The site does not currently operate any mechanical treatment of waste. However the permit allows for the treatment of waste by baling and compaction. If the site commences the mechanical treatment of waste, it would be undertaken within the waste transfer building only.
- 2.4.2 Wastes treated would include DMR, cardboard and general non-hazardous waste to improve recycling rates.

Manual Sorting

- 2.4.3 The site carries out manual sorting of wastes using the sites 360 material handlers. Sorting mostly comprises removal of material (e.g. bulky waste, metals) to improved recycling rates. Removal of non-conforming items for quarantine will also be undertaken.
- 2.4.4 Mixed batteries received at site may also be subject to sorting into separate chemistries.

Repackaging

- 2.4.5 Some chemical wastes received at site is bulked into larger containers for dispatch from site to aid with transport.
- 2.4.6 When chemical waste arrives at the site the chemist will do a visual inspection before any repackaging is undertaken. Waste is accompanied by complete consignment notes. Sampling of chemical wastes will be completed where necessary.
- 2.4.7 Small containers of liquid waste accepted on site (e.g. oils, fuels) are decanted into bulk containers of the same waste stream. Control measures will be operated to ensure there will be no mixing of, of non-hazardous and hazardous waste or incompatible waste.

2.4.8 Repackaging of waste is undertaken in the hazardous waste storage area on appropriate bunding. Spill kits will be available in case of spillage.

2.4.9 Repackaging is undertaken manually by an appropriately trained site operative.

2.5 Waste Storage

2.5.1 Wastes are stored with the aim of ensuring that different types of waste accepted are stored separately where possible to ensure they do not contaminate each other, they can be recycled more easily and transfer notes can be completed correctly. All wastes delivered and accepted to the site are directed to specific areas for storage (or treatment prior to storage).

2.5.2 All wastes on site are stored safely and securely using suitable buildings, bays or containers to ensure waste will not escape. Where wastes are stored in containers they are labelled correctly and covers are utilised where possible to prevent litter and rainfall infiltration and the potential for contaminated surface water run-off.

2.5.3 Wastes are stored to ensure there is no mixing of incompatible wastes. This is particularly important within the hazardous waste storage area, where a qualified chemist attends site to sort and store waste appropriately.

2.5.4 The site layout plan (document reference 1.1) details the location of the waste storage bays and containers on site.

2.5.5 The storage method, maximum storage time, maximum volume and maximum height for any waste storage pile is detailed in Appendix B.

2.5.6 No waste types are stored on site for longer than 3 months.

2.5.7 There is no storage of waste in bales at site.

2.5.8 The key control at site to ensure wastes are stored for the minimum timescales is the use of the principle of "first in, first out". Materials are handled and removed from site in order of receipt therefore ensuring a frequent turnover of materials.

2.5.9 Daily inspections are undertaken at the waste storage areas as set out in Section 3.1. Inspections will include checks for any leaks and spillages and an assessment of pests, odour, dust, litter and noise.

2.6 Materials Stored in Stockpiles

2.6.1 Stockpile sizes are managed via inventory control and the use of SUEZ's Material Manager stock system.

2.6.2 Daily visual monitoring is used to ensure stockpile sizes are not exceeded at the end of the working day. If elevated volume is identified on site during the day, then additional dispatch vehicles can be arranged to ensure volumes are reduced by the end of the day. Visual tools are used on bays to ensure stockpile sizes are not exceeded. Bays are provided with a visual marker system demonstrating both the maximum height and depth that materials within a bay must not exceed to ensure the maximum stockpile size (Appendix B) is not exceeded. Bays are then emptied prior to any exceedance of the marker indicators.

2.6.3 Stock rotation is carried out on site, with the oldest wastes processed and dispatched as a priority.

2.7 Quarantine

- 2.7.1 Staff will carry out ongoing visual inspection of the wastes on delivery. Any non-conforming waste will either be rejected from the site and redirected to an appropriately permitted facility or placed in quarantine prior to removal from site.
- 2.7.2 The TS does not benefit from a dedicated quarantine area as space is limited on site. A temporary quarantine area can be provided within the TS building to quarantine any loads of non-conforming waste. This area will depend upon current waste storage within the building. The quarantined waste will be kept segregated from all other waste. The TS building is upon an impermeable surface with sealed drainage.
- 2.7.3 Any small removeable items of non-conforming waste found within a load will be placed within a suitable container.
- 2.7.4 If significant volumes of waste need to be quarantined then the quarantine procedure and areas as listed in the FPP will be followed.
- 2.7.5 Any quarantined waste placed within the quarantine containers will be removed from site within 3 months.
- 2.7.6 Records will be kept of any rejected or quarantined waste.

2.8 Waste Loading

- 2.8.1 All wastes stored on site are dispatched by road.
- 2.8.2 Wastes stored in bulk in the transfer station are primarily dispatched from site after being loaded into articulated lorries (or other large haulage vehicles).
- 2.8.3 All bulk wastes are loaded using the site's loading shovel and/or 360 excavator.
- 2.8.4 The site staff will ensure that the loading of bulkers for transfer takes place in a controlled manner to minimise the risk of material escaping site.

3 INSPECTION, EMERGENCY PREPAREDNESS & MANAGING NON-CONFORMANCE

3.1 Site Inspections

- 3.1.1 Daily inspections of the site infrastructure are undertaken in line with SUEZ IMS Procedure - *Site Inspection, Audit & Reporting*. Any required site and equipment maintenance is carried out in line with manufacturer's recommendations.
- 3.1.2 Site inspections are recorded on the Daily/ Weekly QEMS checklist or the Vision app.
- 3.1.3 The daily inspections will include checks for the below key risks:
- Leaks and spillages
 - Litter
 - Dust/particulate matter
 - Odour
 - Noise
 - Pests
 - Fire

3.2 Emergency Preparedness

- 3.2.1 Emergency preparedness and response measures are set out within SUEZ IMS Procedure - *Emergency Preparedness & Response* including:
- Spillages
 - Fire
- 3.2.2 Detailed procedures for the prevention of fire and emergency measures to be taken in the event of a fire are described fully within the separate site-specific Fire Prevention Plan (document reference 1.7).
- 3.2.3 General accident management measures are listed in the Accident Prevention and Management Plan (document reference 1.4) and business continuity measures are listed in the Business Continuity and Contingency Plan (document reference 1.5).

3.3 Managing Non-Conformance

- 3.3.1 Procedures for identifying, reporting, investigation and remediation of non-conformances are set out in SUEZ IMS Procedure - *Managing Non-Conformance, Corrective and Preventative Action*.

3.4 Complaints

- 3.4.1 All complaints are managed in line with SUEZ IMS Procedures *Complaints, Managing Non-Conformance, Corrective and Preventative Action, Amenity Control and Monitoring and Amenity Complaints*.

3.5 Leaks & Spillages

- 3.5.1 Any spillages or leaks will be dealt with promptly according to the emergency procedures detailed within IMS Section - *Emergency Preparedness and Response*.

3.6 Site & Equipment Maintenance

- 3.6.1 The selection process of plant and equipment used on site will ensure that it is fit and suitable for the relevant work activity, can be maintained safely, is CE marked and provided with test certificates where necessary.
- 3.6.2 All equipment will be inspected, maintained and serviced in accordance with the manufacturer's/ supplier's instructions and any relevant statutory requirements. Maintenance of plant, equipment and infrastructure will be scheduled as necessary, and implemented and recorded on the site-specific maintenance planner.
- 3.6.3 The maintenance schedule will include all items which are critical to environment and industrial risk.

4 EMISSIONS MANAGEMENT AND MONITORING

4.1 Summary

4.1.1 A summary of the potential emissions from the site and type of emission is in the table below:

Table 2: Emissions

Emission Type	Fugitive	Channelled
Clean surface water	No	Yes
Contaminated surface water	No	Yes
Litter	Yes	No
Mud and Debris	Yes	No
Dust and Fibres	Yes	No
Odours	Yes	No
Noise and Vibration	Yes	No
Pests	Yes	No

4.1.2 The only channelled emissions from site include contaminated runoff to the foul drainage system and the clean surface water to the surface water system.

4.2 Surface and Foul Water Management and Monitoring

4.2.1 The entire site operational area is constructed with impermeable hardstanding of a sufficiently durable construction to withstand the weight of the waste and containers stored at the facility, and the operational vehicles using the facility.

4.2.2 The concrete surface provides an impermeable barrier to protect the underlying ground/groundwater from the transmission of potential contamination by the site activities.

4.2.3 In addition, a sealed drainage system is present to ensure that no liquid will run off the surface other than via the system; except where those discharges may otherwise be permitted.

4.2.4 There are two drainage systems for the site as described below.

4.2.5 The foul drainage system serves the main transfer station building and the external storage bays, as well as the workshop area. It also takes domestic effluent from the weighbridge office.

4.2.6 The foul drainage discharges via interceptors to the main foul sewer on Ling Road.

4.2.7 The surface water system serves site roadways and run off from building roofs. The surface water system is comprised of a number of gullies before leading to surface water sewer.

- 4.2.8 Gullies located in the hazardous waste storage area are sealed. All containers containing liquid waste are appropriately banded and spill kits are located in close proximity to ensure any spillages are cleared up promptly and no fugitive emissions escape from site.
- 4.2.9 The integrity of the impermeable surface will be inspected by site staff on at least a weekly basis, as required by SUEZ's ISO 14001 certified Integrated Management System (IMS), and any structural deficiencies will be reported immediately to the Site Manager. Repairs will be initiated as soon as practicable.
- 4.2.10 Solid matter accumulating in the interceptors and gullies will be removed as and when required by a suitably experienced and registered waste disposal contractor. As a minimum the site interceptors will be cleaned every 6 months.

4.3 Litter

- 4.3.1 Any escaping material adhering to perimeter fencing will be swept/picked up on an on-going basis. Particular emphasis will be placed on ensuring that material is not allowed to escape on to local highways or the adjacent railway line.
- 4.3.2 A final inspection around the site at the end of the working day shall ensure that the site is free of all litter by the end of each business day.
- 4.3.3 In the event there is an escape of litter from the confines of the site and into the local environment, it will be the responsibility of the site staff to arrange for litter picking of the affected areas by the end of the working day. The operation or delivery generating the escape of litter will be stopped and any container releasing fugitive material will be covered or removed from site.
- 4.3.4 Any excessive spillage of materials anywhere within the site or on the adjacent highway will be dealt with immediately by sweeping of the surface and litter picking if required. Such a spillage and the action taken will be recorded in the site diary.

4.4 Mud and Debris

- 5.4.1 General site operations are unlikely to lead to mud and debris emissions. All wastes likely to produce mud or debris are stored inside the transfer station building and regular sweeping/cleaning takes place to ensure that all mud is retained within the building.
- 5.4.2 Regular sweeping of external yard areas takes place to ensure mud is not tracked off site.
- 5.4.3 Should site be notified of any mud or debris being tracked onto the access roads or highway then immediate arrangements shall be made for removal and clean up.

5.5 Dust and Fibres

- 5.5.1 There is the potential for dust to be produced during tipping, storage and loading of some waste (primarily wood). This waste is tipped, stored and loaded internally to reduce the likelihood of dust emissions from site.
- 5.5.2 Regular sweeping of internal and external areas is carried out to prevent build-up of dust on site surfaces.

5.5.3 Waste containers received in the hazardous waste area containing materials with the potential to produce dust must remain sealed.

5.5.4 Mechanical Treatment of waste is not currently undertaken on site. However, if mechanical treatment were to commence, it would be undertaken inside the site building to prevent the emission of dust.

5.5.5 Should excessive levels of dust be identified external to the Transfer Station building then the use of water mist sprays or manual watering with a hose will be used as necessary.

5.6 Odour

5.6.1 Small amounts of putrescible wastes are accepted on site (within general waste deposits) but are stored within the Transfer Station building with roller shutter doors.

5.6.2 Under normal operations, putrescible waste is stored for no longer than 48 hours (72 hours over Bank Holiday weekends).

5.6.3 Waste acceptance checks are carried out to ensure particularly odorous wastes are not accepted, and regular checks are made of the facility and waste stockpiles to ensure that odour emissions are not occurring.

5.6.4 If particularly odorous wastes are identified at any stage, they will be prioritised for removal from site.

5.7 Noise and Vibration

5.7.1 Site operations are not expected to generate noise levels that are deemed excessive. The site staff will ensure that the delivery, processing and loading of waste takes place in a controlled manner so that noise generation is kept to a minimum.

5.7.2 Mechanical Treatment of waste is not currently undertaken on site, but would be undertaken within the transfer station building to ensure noise is minimised.

5.7.3 Increases in plant noise are often indicative of future mechanical failure, as such all relevant plant will be regularly and effectively maintained.

5.8 Pests

5.8.1 In addition to continuous monitoring by site staff, a specialist contractor may attend to any specific incidence of pests on request to ensure eradication.

5.8.2 Regular pest control visits are carried out to monitor pest levels and to ensure that activity does not cause issues.

5 STAFF COMPETENCY & TRAINING

5.1 Summary

- 5.1.1 All sites operating under an environmental permit are required to ensure sufficient staff and resources are available to operate the site effectively and in compliance with the Permit/Integrated Management System.
- 5.1.2 All sites are required to ensure:
- all relevant tasks are undertaken by competent personnel.
 - appropriate records of education, training, skills and experience are held.
 - all personnel performing work on behalf of SUEZ are aware of the SUEZ Integrated Management System (IMS) policies and procedures.

5.2 Staff Competence & Training

- 5.2.1 All new and existing personnel are adequately trained to perform the tasks assigned to them, preventing potential environmental or personal harm.
- 5.2.2 The following table details the roles undertaken on site, with primary and secondary responsibilities listed.

Table 3: Site Roles

Tasks	Primary Responsibility – Role	Secondary Responsibility - Role
Waste Acceptance		
Weighbridge waste acceptance checks	Weighbridge operator	Site supervisor
Site waste acceptance checks	Site operatives	Site supervisor
Waste Storage		
Daily plant checks and cleaning	Site operatives	N/A
Cleaning of reception hall	Site operatives	N/A
QEMS/ Vision checks	Supervisor	Manager
Supervisor checks	Supervisor	Manager
Managers monthly checks	Manager	Regional Manager
Waste Processing		
Arrange haulage for waste to be removed from site	Supervisor	Manager
Operating mobile plant to process, move & load waste materials	Site operatives	Supervisor

Maintenance		
Infrastructure	Supervisor	Manager
Mobile plant	Supervisor	Manager
Monitoring		
Managing surface water	Supervisor	N/A
Amenity Checks		
Amenity checks	Supervisor	Manager
Reporting		
Waste returns	Manager	Regional Manager
Energy efficiency/efficient use of raw materials/avoidance, recovery and disposal of wastes produced by the activities	Manager	Regional Manager
Reportable breaches	Manager	Regional Manager
Procedure updates	Manager	Regional Manager

- 5.2.3 Records of the Technically Competent Manager (TCM) attendance for the site are located within the site's sign in book, site diary or vision app.
- 5.2.4 The procedures used to ensure appropriate training (initial and refresher) and/or qualifications and associated records of training staff and contractors are detailed within the following sections of the IMS:
- Training, Awareness and Competence

6 RESIDUES MANAGEMENT

6.1 Summary

6.1.1 The residues management plan aims to:

- Minimise the generation of residues
- Optimises the reuse, regeneration, recycling, or energy recovery of residues, including packaging
- Ensures the proper disposal of residues where recovery is technically or economically impractical

6.1.2 All wastes generated by the site are managed in line with the waste hierarchy.

6.1.3 SUEZ look to move materials up the waste hierarchy wherever possible and have processes on site to facilitate this (waste sorting, other treatment etc).

6.1.4 SUEZ look to ensure that waste generated by ancillary activities (office etc) is reduced as much as possible. Where this is produced, it is managed in line with the waste hierarchy.

7 DECOMMISSIONING PLAN

7.1 Plant & Equipment Decommissioning

- 7.1.1 There are currently no identified long term non-productive or redundant items on site that require decommissioning or removal.
- 7.1.2 During the operational life of the facility, equipment may no longer be required or will reach the end of its useful life. Any such equipment will be deinstalled (as necessary) by suitably qualified personnel and disposed of appropriately. Where possible equipment will be repaired or reused.

7.2 Site Decommissioning

- 7.2.1 The actions detailed in Table 1 will be undertaken on cessation of waste processing activities prior to the surrender of the Environmental Permit:

Table 4 - Actions to be taken to decommission the site

Item	Action
Waste materials	All waste materials will be removed from site. Any hazardous wastes (oils, batteries, WEEE etc.) will be suitably consigned.
Drains / Gullies	All drains will be checked to ensure that they are clear and free flowing. Any blockages will be removed.
Interceptors	Interceptors will be cleaned and all silt removed for suitable processing / disposal off site.
Plant and Equipment	All waste processing related plant and equipment will be removed. Any items suitable for repair or reuse will be identified as part of this process. Electricity supplies will be made safe.
Weighbridge	The weighbridge pit will be cleaned and all debris removed from site.
Mobile Plant	All mobile plant will be removed from site.
Building	The inside of the building will be cleaned to remove any remaining waste. High level areas will be cleared of any accumulated dust.
Outside areas / perimeter fencing	Any wastes stored externally, as well as redundant equipment and storage containers will be removed from site. The impermeable surface will be swept with a mechanical sweeper and any debris along the site boundary cleared.

- 7.2.2 An up-to-date site condition report will be included in support any application to surrender the Environmental Permit. This will contain a written description of the activities that have been undertaken along with photographs to show that the actions detailed in Table 4 have been completed to the necessary standard.

APPENDICES

Appendix A – Permitted Waste Types

Manning's Heath Transfer Station

Permitted Waste Types

WASTE CODE	DESCRIPTION
01	WASTES RESULTING FROM EXPLORATION, MINING, QUARRYING, AND PHYSICAL AND CHEMICAL TREATMENT OF MINERALS
01 01	Wastes from mineral excavation
01 01 01	Wastes from mineral metalliferous excavation
01 01 02	Wastes from mineral non-metalliferous excavation
01 03	Wastes from physical and chemical processing of metalliferous minerals
01 03 06	Tailings other than those mentioned in 01 03 04 and 01 03 05
01 03 09	Red mud from alumina production other than the wastes mentioned in 01 03 07
01 04	Wastes from physical and chemical processing of non-metalliferous minerals
01 04 08	Waste gravel and crushed rocks other than those mentioned in 01 04 07
01 04 09	Waste sand and clays
01 04 11	Wastes from potash and rock salt processing other than those mentioned in 01 04 07
01 04 12	Tailings and other wastes from washing and cleaning of minerals other than those mentioned in 01 04 07 and 01 04 11
01 04 13	Wastes from stone cutting and sawing other than those mentioned in 01 04 07
02	WASTES FROM AGRICULTURE, HORTICULTURE, AQUACULTURE, FORESTRY, HUNTING AND FISHING, FOOD PREPARATION AND PROCESSING
02 01	Wastes from agriculture, horticulture, aquaculture, forestry, hunting and fishing
02 01 03	Plant tissue waste
02 01 04	Waste plastics (except packaging)
02 01 07	Wastes from forestry
02 01 10	Waste metal
02 02	Wastes from the preparation and processing of meat, fish and other foods of animal origin
02 02 03	Materials unsuitable for consumption or processing
02 03	Wastes from fruit, vegetables, cereals, edible oils, cocoa, coffee, tea and tobacco preparation and processing; conserve production; yeast and yeast extract production, molasses preparation and fermentation
02 03 04	Materials unsuitable for consumption or processing
02 04	Wastes from sugar processing
02 04 01	Soil from cleaning and washing beet
02 04 02	Off-specification calcium carbonate
02 05	Wastes from the dairy products industry
02 05 01	Materials unsuitable for consumption or processing
02 06	Wastes from the baking and confectionery industry
02 06 01	Materials unsuitable for consumption or processing
02 06 02	Wastes from preserving agents

WASTE CODE	DESCRIPTION
02 07	Wastes from the production of alcoholic and non-alcoholic beverages (except coffee, tea and cocoa)
02 07 01	Wastes from washing, cleaning and mechanical reduction of raw materials
02 07 02	Wastes from spirits distillation
02 07 04	Materials unsuitable for consumption or processing
03	WASTES FROM WOOD PROCESSING AND THE PRODUCTION OF PANELS AND FURNITURE, PULP, PAPER AND CARDBOARD
03 01	Wastes from wood processing and the production of panels and furniture
03 01 01	Waste bark and cork
03 01 05	Sawdust, shavings, cuttings, wood, particle board and veneer other than those mentioned in 03 01 04
03 03	Wastes from pulp, paper and cardboard production and processing
03 03 01	Waste bark and wood
03 03 07	Mechanically separated rejects from pulping of waste paper and cardboard
03 03 08	Wastes from sorting of paper and cardboard destined for recycling
03 03 10	Fibre rejects, fibre-, filler- and coating sludges from mechanical separation
04	WASTES FROM THE LEATHER, FUR AND TEXTILE INDUSTRIES
04 01	Wastes from the leather and fur industry
04 01 08	Waste tanned leather (blue sheetings, shavings, cuttings, buffing dust) containing chromium
04 01 09	Wastes from dressing and finishing
04 02	Wastes from the textile industry
04 02 21	Wastes from unprocessed textile fibres
04 02 22	Wastes from processed textile fibres
06	WASTES FROM INORGANIC CHEMICAL PROCESSES
06 09	Wastes from the MSFU of phosphorous chemicals and phosphorous chemical processes
06 09 02	Phosphorous slag
06 09 04	Calcium-based reaction wastes other than those mentioned in 06 09 03
06 11	Wastes from the manufacture of inorganic pigments and opacifiers
06 11 01	Calcium-based reaction wastes from titanium dioxide production
07	WASTES FROM ORGANIC CHEMICAL PROCESSES
07 02	Wastes from the MFSU of plastics, synthetic rubber and man-made fibres
07 02 13	Waste plastic
08	WASTES FROM THE MANUFACTURE, FORMULATION, SUPPLY AND USE (MFSU) OF COATINGS (PAINTS, VARNISHES AND VITREOUS ENAMELS), ADHESIVES, SEALANTS AND PRINTING INKS
08 01	wastes from MFSU and removal of paint and varnish
08 01 11*	waste paint and varnish containing organic solvents or other hazardous substances
08 01 12	waste paint and varnish other than those mentioned in 08 01 11
08 03	wastes from the manufacture, formulation, supply and use (MFSU) of printing inks
08 03 12*	waste ink containing hazardous substances
08 03 13	waste ink other than those mentioned in 08 03 12
08 04	wastes from the manufacture, formulation, supply and use (MFSU) of adhesives and sealants (including waterproofing products)

WASTE CODE	DESCRIPTION
08 04 09*	waste adhesives and sealants containing organic solvents or other hazardous substances
08 04 10	waste adhesives and sealants other than those mentioned in 08 04 09
09	WASTES FROM THE PHOTOGRAPHIC INDUSTRY
09 01	Wastes from the photographic industry
09 01 07	Photographic film and paper containing silver or silver compounds
09 01 08	Photographic film and paper free of silver or silver compounds
09 01 10	Single-use cameras without batteries
09 01 12	Single-use cameras containing batteries other than those mentioned in 09 01 11
10	WASTES FROM THERMAL PROCESSES
10 01	Wastes from power stations and other combustion plants (except 19)
10 01 01	Bottom ash, slag and boiler dust (excluding boiler dust mentioned in 10 01 04)
10 01 05	Calcium-based reaction wastes from flue-gas desulphurisation in solid form
10 01 07	Calcium-based reaction wastes from flue-gas desulphurisation in sludge form
10 01 15	Bottom ash, slag and boiler dust from co-incineration other than those mentioned in 10 01 14
10 01 19	Wastes from gas cleaning other than those mentioned in 10 01 05, 10 01 07 and 10 01 18
10 01 24	Sands from fluidised beds
10 02	Wastes from the iron and steel industry
10 02 01	Wastes from the processing of slag
10 02 02	Unprocessed slag
10 02 08	Solid wastes from gas treatment other than those mentioned in 10 02 07
10 02 10	Mill scales
10 02 14	Filter cakes from gas treatment other than those mentioned in 10 02 13
10 02 15	Other filter cakes
10 03	Wastes from aluminium thermal metallurgy
10 03 02	Anode scraps
10 03 05	Waste alumina
10 03 16	Skimmings other than those mentioned in 10 03 15
10 03 18	Carbon-containing wastes from anode manufacture other than those mentioned in 10 03 17
10 03 24	Solid wastes from gas treatment other than those mentioned in 10 03 23
10 03 26	Filter cakes from gas treatment other than those mentioned in 10 03 25
10 03 28	Wastes from cooling water treatment other than those mentioned in 10 03 27
10 03 30	Waste from treatment of salt slags and black drosses other than those mentioned in 10 03 29
10 04	Waste from lead thermal metallurgy
10 04 10	Waste from cooling-water other than those mentioned in 10 04 09
10 05	Wastes from zinc thermal metallurgy
10 05 01	Slags from primary and secondary production
10 05 09	Waste from cooling-water other than those mentioned in 10 05 08
10 05 11	Dross and skimmings other than those mentioned in 10 05 10
10 06	Waste from copper thermal metallurgy

WASTE CODE	DESCRIPTION
10 06 01	Slags from primary and secondary production
10 06 02	Dross and skimmings from primary and secondary production
10 06 10	Wastes from cooling-water treatment other those mentioned in 10 06 09
10 07	Wastes from silver, gold and platinum thermal metallurgy
10 07 01	Slags from primary and secondary production
10 07 02	Dross and skimmings from primary and secondary production
10 07 03	Solid waste from gas treatment
10 07 05	Filter cakes from gas treatment
10 07 08	Wastes from cooling-water treatment other those mentioned in 10 07 07
10 08	Wastes from other non-ferrous thermal metallurgy
10 08 09	Other slags
10 08 11	Dross and skimmings other than those mentioned in 10 08 10
10 08 13	Carbon containing waste from anode manufacture other than those mentioned in 10 08 12
10 08 14	Anode scrap
10 08 18	Filter cakes from flue-gas other than those mentioned in 10 08 17
10 08 20	Wastes from cooling-water treatment other than those mentioned in 10 08 19
10 09	Wastes from casting of ferrous pieces
10 09 03	Furnace slag
10 09 06	Casting cores and moulds which have not undergone pouring other than those mentioned in 10 09 05
10 09 08	Casting cores and moulds which have undergone pouring other than those mentioned in 10 09 07
10 09 14	Waste binders other than those mentioned in 10 09 13
10 09 16	Waste crack-indicating agent other than those mentioned in 10 09 15
10 10	Waste from casting of non-ferrous pieces
10 10 03	Furnace slag
10 10 06	Casting cores and moulds which have not undergone pouring, other than those mentioned in 10 10 05
10 10 08	Casting cores and moulds which have undergone pouring, other than those mentioned in 10 10 07
10 10 14	Waste binders other than those mentioned in 10 10 13
10 10 16	Waste crack-indicating agents other than those mentioned in 10 10 15
10 11	Wastes from manufacture of glass and glass products
10 11 03	Waste glass-based fibrous materials
10 11 10	Waste preparation mixture before thermal processing, other than those mentioned in 10 11 09
10 11 12	Waste glass other than those mentioned in 10 11 11
10 11 16	Solid wastes from flue-gas treatments other than those mentioned in 10 11 15
10 11 18	Filter cakes form flue-gas treatment other than those mentioned in 10 11 17
10 12	Wastes from manufacture of ceramic goods, bricks, tiles and construction products
10 12 01	Waste preparation mixture before thermal processing
10 12 05	Filter cakes form gas treatment
10 12 06	Discarded moulds

WASTE CODE	DESCRIPTION
10 12 08	Waste ceramics, bricks, tiles and construction products (after thermal processing)
10 12 10	Solid wastes from gas treatments other than those mentioned in 10 12 09
10 12 12	Wastes from glazing other than those mentioned in 10 12 11
10 13	Wastes from manufacture of cement, lime and plaster and articles and products made from them
10 13 01	Waste preparation mixture before thermal processing
10 13 04	Wastes from calcination and hydration of lime
10 13 07	Filter cakes from gas treatment
10 13 10	Wastes from asbestos-cement manufacture other than those mentioned in 10 13 09
10 13 11	Wastes from cement-based composite materials other than those mentioned in 10 13 09 and 10 13 10
10 13 13	Solid wastes from gas treatments other than those mentioned in 10 13 12
10 13 14	Waste concrete
11	WASTES FROM CHEMICAL SURFACE TREATMENT AND COATING OF METALS AND OTHER MATERIALS; NON-FERROUS HYDRO METALLURGY
11 01	Wastes from chemical surface treatment and coating of metals and other materials (for example galvanic processes, zinc coating processes, picking processes, etching, phosphatising, alkaline degreasing, anodising)
11 01 10	Filter cakes other than those mentioned in 11 01 09
11 01 14	Degreasing wastes other than those mentioned in 11 01 13
11 02	Wastes from non-ferrous hydrometallurgical processes
11 02 03	Waste from the production of anodes for aqueous electrolytical processes
11 02 06	Waste from copper hydrometallurgical processes other than those mentioned in 11 02 05
11 05	Wastes from hot galvanising processes
11 05 01	Hard zinc
11 05 02	Zinc ash
12	WASTES FROM SHAPING AND PHYSICAL AND MECHANICAL SURFACE TREATMENT OF METALS AND PLASTICS
12 01	Wastes from shaping and physical and mechanical surface treatment of metals and plastics
12 01 01	Ferrous metal filings and turnings
12 01 03	Non-ferrous metal filings and turnings
12 01 05	Plastics shavings and turnings
12 01 10*	synthetic machining oils
12 01 13	Welding wastes
12 01 16*	waste blasting material containing hazardous substances
12 01 17	Waste blasting material other than those mentioned in 12 01 16
12 01 21	Spent grinding bodies and grinding materials other than those mentioned in 12 01 20
13	OIL WASTES AND WASTES OF LIQUID FUELS (EXCEPT EDIBLE OILS, AND THOSE IN CHAPTERS 05, 12 AND 19)
13 02	waste engine, gear and lubricating oils
13 02 05*	mineral-based non-chlorinated engine, gear and lubricating oils

WASTE CODE	DESCRIPTION
13 05	oil/water separator contents
13 05 07*	oily water from oil/water separators
13 07	wastes of liquid fuels
13 07 02*	Petrol
13 07 03*	other fuels (including mixtures)
15	WASTE PACKAGING; ABSORBENTS, WIPING CLOTHS, FILTER MATERIALS AND PROTECTIVE CLOTHING NOT OTHERWISE SPECIFIED
15 01	Packaging (including separately collected municipal packaging waste)
15 01 01	Paper and cardboard packaging
15 01 02	Plastic packaging
15 01 03	Wooden packaging
15 01 04	Metallic packaging
15 01 05	Composite packaging
15 01 06	Mixed packaging
15 01 07	Glass packaging
15 01 09	Textile packaging
15 01 10*	Packaging containing residues of or contaminated by hazardous substances
15 02	Absorbents, filter materials, wiping cloths and protective clothing
15 02 02*	Absorbents, filter materials (including oil filters not otherwise specified), wiping cloths, protective clothing contaminated by hazardous substances
15 02 03	Absorbents, filter materials, wiping cloths and protective clothing other than those mentioned in 15 02 02
16	WASTES NOT OTHERWISE SPECIFIED IN THE LIST
16 01	End-of-life vehicles from different means of transport (including off-road machinery) and wastes from dismantling of end-of-life vehicles and vehicle maintenance (except 13, 14, 16 06 and 16 08)
16 01 03	End-of-life tyres
16 01 07*	oil filters
16 01 13*	brake fluids
16 01 14*	antifreeze fluids containing hazardous substances
16 01 15	antifreeze fluids other than those mentioned in 16 01 14
16 02	Wastes from electrical and electronic equipment
16 02 11*	discarded equipment containing chlorofluorocarbons, HCFC, HFC
16 02 13*	discarded equipment containing hazardous components other than those mentioned in 16 02 09 to 16 02 12
16 02 14	Discarded equipment other than those mentioned in 16 02 09 to 16 02 13
16 02 16	Components removed from discarded equipment other than those mentioned in 16 02 15
16 03	Off-specification batches and unused products
16 03 04	Inorganic wastes other than those mentioned in 16 03 03
16 03 06	Organic wastes other than those mentioned in 16 03 05
16 05	gases in pressure containers and discarded chemicals
16 05 04*	gases in pressure containers (including halons) containing hazardous substances
16 05 05	gases in pressure containers other than those mentioned in 16 05 04

WASTE CODE	DESCRIPTION
16 05 07*	discarded inorganic chemicals consisting of or containing hazardous substances
16 05 09	discarded chemicals other than those mentioned in 16 05 06, 16 05 07 or 16 05 08
16 06	Batteries and accumulators
16 06 01*	lead batteries
16 06 02*	Ni-Cd batteries
16 06 03*	mercury-containing batteries
16 06 04	Alkaline batteries (except 16 06 03)
16 06 05	Other batteries and accumulators
16 07	wastes from transport tank, storage tank and barrel cleaning (except 05 and 13)
16 07 08	wastes containing oil
16 10	aqueous liquid wastes destined for off-site treatment
16 10 02	aqueous liquid wastes other than those mentioned in 16 10 01
16 11	Waste linings and refractories
16 11 02	Carbon based linings and refractories from metallurgical processes other than those mentioned in 16 11 01
16 11 04	Other linings and refractories from metallurgical processes other than those mentioned in 16 11 03
16 11 06	Linings and refractories from non-metallurgical processes other than those mentioned in 16 11 05
17	CONSTRUCTION AND DEMOLITION WASTES (INCLUDING EXCAVATED SOIL FROM CONTAMINATED SITES)
17 01	Concrete, bricks, tiles and ceramics
17 01 01	Concrete
17 01 02	Bricks
17 01 03	Tiles and ceramics
17 01 07	Mixtures of concrete, bricks, tiles and ceramics other than those mentioned in 17 01 06
17 02	Wood, glass and plastic
17 02 01	Wood
17 02 02	Glass
17 02 03	Plastic
17 03	Bituminous mixtures, coal tar and tarred products
17 03 02	Bituminous mixtures other than those mentioned in 17 03 01
17 04	Metals (including their alloys)
17 04 01	Copper, bronze, brass
17 04 02	Aluminium
17 04 03	Lead
17 04 04	Zinc
17 04 05	Iron and steel
17 04 06	Tin
17 04 07	Mixed metals
17 04 11	Cables other than those mentioned in 17 04 10
17 05	Soil (including excavated soil from contaminated sites), stones and dredging spoil

WASTE CODE	DESCRIPTION
17 05 04	Soil and stones other than those mentioned in 17 05 03
17 05 08	Track ballast other than those mentioned in 17 05 07
17 06	Insulation materials and asbestos-containing construction materials
17 06 01*	Insulation materials containing asbestos
17 06 04	Insulation materials other than those mentioned in 17 06 01 and 17 06 03
17 06 05*	Construction materials containing asbestos
17 08	Gypsum-based construction material
17 08 02	Gypsum-based construction materials other than those mentioned in 17 08 01
17 09	Other construction and demolition wastes
17 09 04	Mixed construction and demolition wastes other than those mentioned in 17 09 01, 17 09 02 and 17 09 03
18	WASTES FROM HUMAN OR ANIMAL HEALTH CARE AND/OR RELATED RESEARCH (EXCEPT KITCHEN AND RESTAURANT WASTES NOT ARISING FROM IMMEDIATE HEALTH CARE)
18 01	wastes from natal care, diagnosis, treatment or prevention of disease in humans
18 01 04	Waste that as wastes whose collection and disposal is not subject to special requirements in order to prevent infection(for example dressings, plaster casts, linen, disposable clothing, diapers)
19	WASTES FROM WASTE MANAGEMENT FACILITIES, OFF-SITE WASTE WATER TREATMENT PLANTS AND PREPARATION OF WATER INTENDED FOR HUMAN CONSUMPTION/INDUSTRIAL USE
19 01	Wastes from incineration or pyrolysis of waste
19 01 02	Ferrous materials removed from bottom ash
19 01 12	Bottom ash and slag other than those mentioned in 19 01 11
19 01 18	Pyrolysis wastes other than those mentioned in 19 01 17
19 01 19	Sands from fluidised beds
19 02	Wastes from physical/chemical treatments of waste (including dechromatation, decyanidation, neutralisation)
19 02 03	Premixed wastes composed only of non-hazardous wastes
19 02 10	Combustible wastes other than those mentioned in 19 02 08 and 19 02 09
19 04	Vitrified waste and wastes from vitrification
19 04 01	Vitrified waste
19 05	Wastes from aerobic treatment of solid wastes
19 05 01	Non-composted fraction of municipal and similar wastes
19 05 02	Non-composted fraction of animal and vegetable waste
19 05 03	Off-specification compost
19 12	Wastes from the mechanical treatment of waste (for example sorting, crushing, compacting, pelletising) not otherwise specified
19 12 01	Paper and cardboard
19 12 02	Ferrous metal
19 12 03	Non-ferrous metal
19 12 04	Plastic and rubber
19 12 05	Glass
19 12 07	Wood other than that mentioned in 19 12 06
19 12 08	Textiles

WASTE CODE	DESCRIPTION
19 12 09	Minerals (for example sand, stones)
19 12 10	Combustible waste (refuse derived fuel)
19 13	Wastes from all groundwater remediation
19 13 02	Solid wastes from soil remediation other than those mentioned in 19 13 01
20	MUNICIPAL WASTES (HOUSEHOLD WASTE AND SIMILAR COMMERCIAL, INDUSTRIAL AND INSTITUTIONAL WASTES) INCLUDING SEPARATELY COLLECTED FRACTIONS
20 01	Separately collected fractions (except 15 01)
20 01 01	Paper and cardboard
20 01 02	Glass
20 01 08	Biodegradable kitchen and canteen waste
20 01 10	Clothes
20 01 11	Textiles
20 01 21*	fluorescent tubes and other mercury-containing waste
20 01 23*	discarded equipment containing chlorofluorocarbons
20 01 27*	paint, inks, adhesives and resins containing hazardous substances
20 01 28	paint, inks, adhesives and resins other than those mentioned in 20 01 27
20 01 33*	batteries and accumulators included in 16 06 01, 16 06 02 or 16 06 03 and unsorted batteries and accumulators containing these batteries
20 01 34	Batteries and accumulators other than those mentioned in 20 01 33
20 01 35*	discarded electrical and electronic equipment other than those mentioned in 20 01 21 and 20 01 23 containing hazardous component
20 01 36	Discarded electrical and electronic equipment other than those mentioned in 20 01 21, 20 01 23 and 20 01 35
20 01 38	Wood other than that mentioned in 20 01 37
20 01 39	Plastics
20 01 40	Metals
20 01 41	Wastes from chimney sweeping
20 02	Garden and park wastes (including cemetery waste)
20 02 01	Biodegradable waste
20 02 02	Soil and stones
20 03	Other municipal wastes
20 03 01	Mixed municipal waste
20 03 02	Waste from markets
20 03 03	Street-cleaning residues
20 03 07	Bulky waste

Appendix B – Waste Storage Details

Mannings Heath Transfer Station – Waste Storage Plan

APPENDIX A – WASTE STORAGE DETAILS

Waste type	Form	Location within site	Storage detail	Bay or Container Dimensions	Volume of waste (m ³)	Maximum storage time on site
Bulky General Waste incl. POPs	Loose	Internal Bay	In a concrete storage bay	15m (W) x 13.5m (L) x 3.5m (H)	532 m ³	72 Hours
Dry mixed recyclables	Loose	Internal Bay	In a concrete storage bay	6m (W) x 6.5m (L) x 3.5m (H)	102 m ³	72 Hours
Wood	Loose	External Bay	In a concrete storage bay	17m (W) x 6.5m (L) x 3.5 (H)	290 m ³	2 Weeks
Glass	Loose	External Bay	In a concrete storage bay	3m (W) x 6.5m (L) x 3.5 (H)	51 m ³	1 Month
UPVC	Loose	External Bay	In a concrete storage bay	6.5m (W) x 6.5m (L) x 3.5 (H)	111 m ³	1 Month
Cardboard	Loose	External (Covered) Bay	In a metal and Concrete storage bay	7.5m (W) x 9m (L) x 3.5 (H)	177 m ³	2 Weeks
Gas canisters	Loose	Gas Cage	In a concrete storage bay	3m (W) x 2m (L) x 1m* (H) *1m Assumed as gas bottles will not be stacked on top of one another	6 m ³	3 Months
Metal	Loose	RORO bin	In a standard 40 cubic yard RORO container	2.4m (W) x 6.2m (L) x 2.9m (H)	30 m ³	1 Month
Asbestos	Double bagged	External Haz Waste Storage Area	Enclosed 16yd Skip	1.7m (W) x 4.1m (L) x 2m (H)	12 m ³	3 Months
Fridges	Loose	External Haz Waste Storage Area	In a standard 40 cubic yard RORO container	2.4m (W) x 6.2m (L) x 2.9m (H)	30 m ³	1 Month
Tyres	Loose	External Haz Waste Storage Area	In a standard 40 cubic yard RORO container	2.4m (W) x 6.2m (L) x 2.9m (H)	30 m ³	3 Months

Lithium Batteries	Loose	External Haz Waste Storage Area	In a Standard Battery Box	2m (W) x 1m (L) x 2m (H)	4 m ³	1 Month
Fluorescent Tubes/ bulbs	Loose	External Haz Waste Storage Area	Specialised Container	1.2m (W) x 2.5m (L) x 1.2m (H)	3.6 m ³	3 Months
Lead Acid Batteries	Loose	External Haz Waste Storage Area	In a Standard Battery Box	2m (W) x 1m (L) x 2m (H)	4 m ³	1 Month
Ni-Cd Batteries	Loose	External Haz Waste Storage Area	In a Standard Battery Box	2m (W) x 1m (L) x 2m (H)	4 m ³	1 Month
Contaminated/ mixed Fuel	Liquid	External Haz Waste Storage Area (Covered)	Intermediate Bulk Container	1.0m (W) x 1.2m (L) x 1.16m (H)	1.4 m ³	1 Month
Paint	Loose	External Haz Waste Storage Area (Covered)	205L Drum	0.59 (D) x 0.88m (H)	0.2 m ³	1 Month
Grease & Containers	Loose	External Haz Waste Storage Area (Covered)	205L Drum	0.59 (D) x 0.88m (H)	0.2 m ³	1 Month
Petrol	Liquid	External Haz Waste Storage Area (Covered)	Intermediate Bulk Container	1.0m (W) x 1.2m (L) x 1.16m (H)	1.4 m ³	1 Month
Oil Filters	Loose	External Haz Waste Storage Area (Covered)	205L Drum	0.59 (D) x 0.88m (H)	0.2 m ³	1 Month
Spill Sorbs/ Oily Hoses	Loose	External Haz Waste Storage Area (Covered)	205L Drum	0.59 (D) x 0.88m (H)	0.2 m ³	1 Month
Laser Dust	Containerised	External Haz Waste Storage Area (Covered)	205L Drum	0.59 (D) x 0.88m (H)	0.2 m ³	1 Month
PVA Water	Liquid	External Haz Waste Storage Area (Covered)	Intermediate Bulk Container	1.0m (W) x 1.2m (L) x 1.16m (H)	1.4 m ³	1 Month
Caustic Contaminated Water	Liquid	External Haz Waste Storage Area (Covered)	Intermediate Bulk Container	1.0m (W) x 1.2m (L) x 1.16m (H)	1.4 m ³	1 Month
Oily Water	Liquid	External Haz Waste Storage Area (Covered)	Intermediate Bulk Container	1.0m (W) x 1.2m (L) x 1.16m (H)	1.4 m ³	1 Month
Styrene Sludge	Liquid	External Haz Waste Storage Area (Covered)	Intermediate Bulk Container	1.0m (W) x 1.2m (L) x 1.16m (H)	1.4 m ³	1 Month

Cutting oil	Liquid	External Haz Waste Storage Area (Covered)	Intermediate Bulk Container	1.0m (W) x 1.2m (L) x 1.16m (H)	1.4 m ³	1 Month
Gunwash	Liquid	External Haz Waste Storage Area (Covered)	Intermediate Bulk Container	1.0m (W) x 1.2m (L) x 1.16m (H)	1.4 m ³	1 Month
Ink	Containerised	External Haz Waste Storage Area (Covered)	205L Drum	0.59 (D) x 0.88m (H)	0.2 m ³	1 Month
Toner Cartridges	Loose	External Haz Waste Storage Area (Covered)	205L Drum	0.59 (D) x 0.88m (H)	0.2 m ³	1 Month
PCBs	Loose	External Haz Waste Storage Area (Covered)	HDPE Dolav Container	2m (W) x 1m (L) x 2m (H)	4 m ³	1 Month
Dental Waste moulds	Loose	External Haz Waste Storage Area (Covered)	HDPE Dolav Container	2m (W) x 1m (L) x 2m (H)	4 m ³	1 Month

Note: all volume calculations allow for material slump at the front of the storage area and so equate to 75% of the total cubic volume, all waste stored within the hazardous waste storage area is within containers and so maximum pile sizes do not apply.
