

Application for an environmental permit – Part C2 – General – varying a bespoke permit

EPR/DP3997HK/V002 - Durley Chine Transfer Station

BCP Council holds an environmental permit for the Durley Chine Transfer Station.

We are applying to vary the permit to increase the annual throughput of waste on the site from 50 tonnes to 500 tonnes.

The site is used for the storage (before transfer) of beach litter waste removed from the main beaches of Poole and Bournemouth. This will include waste that has been washed up onto the beach. The waste is deposited into skips, in a designated waste bay. Skips are then covered whilst not in use.

PreApp advice has been sought (Basic Pre-Application - EPR/DP3997HK/V002 - Durley Chine Transfer Station 24.06.2022) which advised we should carry out a normal variation of your existing bespoke permit.

As part of the application to vary permit the SPA and SSSI will be considered.
