

002 – Proposed Changes

The proposed changes to the permit at Henbury Depot Consist of the addition of non-hazardous waste codes and the addition of land within the permitted area. The additional waste codes are outside of the current standard rules permit but do not represent an increased risk to the environment.

It is proposed to treat the below materials (in addition to the existing permitted wastes) through crushing, screening, blending, and mixing and incorporating the treated wastes into specification compliant materials such as unbound aggregates and bound pavement materials. The products are to meet the specification of highway works and associated specifications and guidance, allowing the wastes to be fully recovered.

Additional Proposed Waste Codes

| EWC Code | Description |
|----------|--|
| 10 09 03 | furnace slag |
| 10 09 06 | casting cores and moulds which have not undergone pouring other than those mentioned in 10 09 05 |
| 10 09 08 | casting cores and moulds which have undergone pouring other than those mentioned in 10 09 07 |
| 10 09 12 | other particulates other than those mentioned in 10 09 11 |
| 17 09 04 | mixed construction and demolition wastes other than those mentioned in 17 09 01, 17 09 02 and 17 09 03 |

Additional Area to the Permit
