

Appendix 6d raw materials

Ingredients

Efficient use of materials to ensure safe consumption and value of premium product, wastes minimised with off specification products downgraded or re-blended as minor ingredient.

Packaging

Packaging minimised to allow safe transport and storage of product, PEFC certified cardboard replaced plastic packaging.

Lightweight cans saving approximately 70 tonnes of aluminium, well established open circular recovery loop.

Glass bottles contain up to 77% recycled glass, well established open circular recovery loop.

Kegs used for volume deliveries, returned, cleaned and re used in closed circular recovery loop.

Water

Water primarily used as ingredient, remaining water used to efficiently clean equipment and kegs for reuse.
