Hi Thomas, all good here thanks. Hope you are too.
Pleased find attached habitats screening report for the hangar.
Hope it helps it become duly made!

Thanks

Roddy Lewis

Subject: RE: Millers - Habitats & Assessments

Hi Roddy,

Thanks very much for this – as these activities would now be classed as installations, the distances would need to be covered up to and including 10km, just for reference.

Would it be possible to get a list of what the habitats in question are called within the assessment? Thanks very much for the clarification on the levels of risk and the processes inside the hangar.

Many thanks,

Thomas.

Thomas Haines, BSc, GradiEMA

Subject: RE: Millers - Habitats & Assessments

Hi Tom, happy new year.

As all of the activities are taking place within the hangar, there are no habitas I can find that are going to be affected by the processes on site. Further more the nearest sensitive site being a Ramsar and Special protection area, is over 1.2km away. The site is outside of an Area of Natural Beauty, and SSSI's are not within 2km. The only emissions from site, being bioaerosols and their impact on the local environment are logged on the Bioaerosol Risk assessment that was included in the application bundle.

In regards to the EWC codes for each operation, we require the codes on the historic permit to remain the same, obviously without the A3 activity. With the addition of 03 03 07 to the A5 activity. Other than that there should not be any changes to EWC codes.

I've attached the current permit for reference along with the non technical summary.

Thanks
Roddy Lewis

Subject: Millers - Habitats & Assessments

Hi Roddy,

Hope all is well firstly, and that you've had a good Christmas and new year firstly.

I'm just tidying up this one before sending for duly making. Having looked at the risk assessments, it appears it's taken from the waste standard rules. For the habitats that you believe are impacted, we would need all relevant nature and heritage sites, habitats and species identified, impacts assessed or sufficient information provided to support our assessment.

If you could please update the risk assessment to show this, that would be greatly appreciated.

Also, do we have a list of waste codes for each individual activity on site?

Many thanks,

Thomas.
