

DUNPHY COMBUSTION LTD.

Queensway Rochdale England OL11 2SL

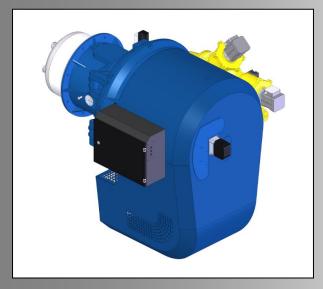

DATA SHEET

Model: TG6 Revision Date: November 2019

Output: 1200 – 14000 kW Revision Number: DS.TG6.14

- ♦ All models approved to current British and European Standards.
- All burners in the T.G. range are of the fan assisted, nozzle mix type and operation is fully automatic.
- All models have been independently tested to the European Standard BS EN676 'Automatic forced draught burners for gaseous fuels.'
- CE approval number for the TG6 Series burners are:
- ◆ TG6.1200/1400 CE 679311

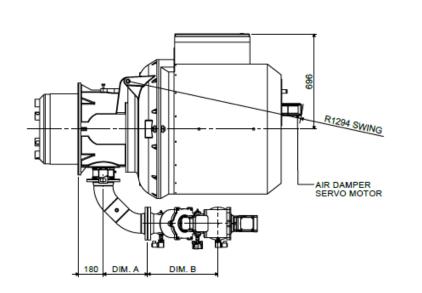

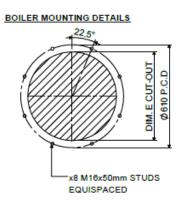

BURNER DIMENSIONS

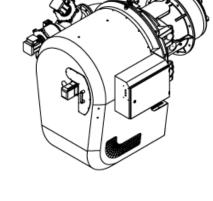

- ♦ Drawings show on the following pages
- All dimensions in mm unless otherwise stated.
- The minimum standard dimension for 'PROJ' is 280mm. However, it can be varied to suit application. Requirements should be stated when unit is ordered.
- Burners supplied as Left hand hinge or Right hand hinge
- The swing radius shown is the average; this can vary on non-standard burners.
- Please check the issue number to ensure validity.

COMBUSTION HEAD

The Dunphy gas combustion head incorporates a twostage fuel/air mixing system which eliminates low frequency resonance and allows maximum combustion efficiency with minimum emission levels.

This system combined with smooth ignition and extreme reliability make Dunphy combustion equipment the most sensible choice for all heating and process applications.

ULTRA LOW NOX BURNERS

All Dunphy T-Series burners are fitted with low NOx combustion heads as standard equipment.

As an optional extra all burners in this range can be fitted with an internal recirculation system to achieve ultralow NOx emissions.
