

About this consultation

CH65 4HB, Essar Oil (UK) Limited: environmental permit consultation

The aim of this consultation is to ask whether you have any comments relevant to the permit application

We want to make the best decision when permitting. Listening to the views of others helps us to take account of concerns, or local environmental factors, that we may not be otherwise aware of.

We are seeking comments on the application for Essar Oil (UK) Limited. Please use the reference number below when making comments on this application.

- Permit Number: EPR/FP3139FN/V015
- Regulated facility type: The installation processes crude oil in a refinery with the primary activity being,
 - Section 1.2 Part A(1)(d) – Refining mineral oil (cracking, secondary processes and distillation).

This application relates to the proposed solution for Essar Oil UK's derogation to BAT 34. To address BAT 34, the main crude distillation furnaces will be replaced with a new furnace, which will incorporate low-NOx burners. This will enable the emission limit values stipulated for NOx in the BAT conclusions to be met. This variation also includes a request for an extension of an existing time limited derogation from BAT Conclusion 34 of the Refining of Mineral Oil and Gas BAT conclusions, subject to the conditions and controls specified in the permit. BAT Conclusion 34 specifies the techniques to be implemented in order to reduce NOx emissions to air from a gas fired combustion unit.

- Regulated facility location: Stanlow Manufacturing Complex, PO Box 3, Ellesmere Port, Cheshire, CH65 4HB

Non-Technical Summary

Refer to the non-technical summary which explains this application, in non-technical language.

This should include a summary of the regulated facility, the key technical standards and control measures arising from the risk assessment.

What the response will be used for

We will take your consultation responses into consideration as part of our determination of the permit. If we decide to grant the permit we will explain how we made our decision and how we have addressed the concerns that were raised.

We will only issue a permit if we believe that harm to the environment, people and wildlife will be minimised and that the operator has the ability to meet the conditions of the permit. Providing a business can prove that the proposed activities meet all the legal requirements, including environmental, technological and health requirements, then we are legally obliged to issue a permit, even if some people do not approve of the decision.

How to Respond

If you would like to comment online, please use the online consultation tool in Citizen Space.

If you'd prefer to submit your response by email, contact PSCpublicresponse@environment-agency.gov.uk
