Subject: GB3808FD/A001: Not Duly Made Response

Good morning Joanne,

Following on from the Not Duly Made letter you issued on 20th November and our correspondence last week, please see below dropbox link for the requested information listed below:

Application Charge:

As mentioned last week, the operator has paid the additional fee of £2,487 (payment reference number PSCAPPSEWEL200).

Continuing Competence Certificate:

See dropbox link for Craig Chaplin's most recent continuing competence certificate expiring 21/11/2020.

Environmental Management System:

See dropbox link for draft copy of the procedures which will form part of the site specific EMS.

Daily Treatment Capacity:

The wash plant facility has a treatment capacity of 1000t per day.

With regards to your additional query regarding the D9 activity on 22 November 2018, the application is for a waste treatment plant. We do not need the D codes if, under the R codes, residual wastes from the treatment process can be disposed of to landfill. We note that in standard rules SR2010No12 (Treatment of waste to produce soil, soil substitutes and aggregate) there are limits on the treatment of slags and ashes only for disposal, so that the permit does not allow installation activities, but we are not proposing to take these waste types.

Noise Impact Assessment and Management Plan:

The Noise Assessment produced for the planning application and a Noise Management Plan are on the dropbox link.

We are waiting to hear whether you will accept a qualitative noise assessment for duly making or whether you require a new quantitative assessment under BS4142:2014.

Dust Management Plan:

We note that your guidance on Dust Management Plans was updated after the permit application was issued. See dropbox link for Dust Management Plan.

Waste Codes:

As confirmed in my email to you on 21/11/2018 the correct waste codes are 10 11 and 10 11 03 (waste glass-based fibrous materials).

I hope that this response is sufficient to deem the application duly makeable, please let me know as soon as possible if you require any further materials.

Kindest regards,

Lauren Hayward
