Subject: RE: Shelford MRF Application

Good morning Paul,

Following the submission of the NIA and updated documents I received on Monday I have continued with our duly making checks.

Just one thing of note before proceeding; when the application was triaged in September my colleague Francis requested both an NIA and NMP as indicated as required for this application by our screening tool. Only the NIA has been submitted and I understand no noise management plan has been drafted based upon the conclusion in the NIA that there would be no impact upon receptors. However, the conclusion is dependent on a site mitigation strategy including noise control measures. Typically, these would be also be submitted in a noise management plan because they are active measures being taken to reduce the noise. If I proceed to duly make the application as is, there is a significant chance that we will still require the NMP following assessment of the NIA.

As there is time involved for all parties in assessing the NIA and supporting data and then subsequently drafting and assessing the NMP I would suggest this is something that is provided as soon as possible to prevent impacts on the determination time.

I will proceed to duly make the application and begin consultation and assessment of the supplied supporting information.

Thanks,

Jonty Bates

Jonty

Following the submission of the additional information in relation to this Shelford MRF application on Monday 20 /11, do you know when you will be in a permission to confirm if it has been duly made?

Many thanks

Paul
