Dear Sirs

Application for a Bespoke Environmental Permit for a Household, Commercial and Industrial Waste Transfer Station

Wrights of Twycross Limited – Harris Bridge Farm Waste Transfer Station, Sibson, Warwickshire, CV13 6LS.

Please find the attached Bespoke Permit Application to undertake a Household, Commercial and Industrial Waste Transfer Station at the above address. Due to the size of the files, I have only attached the application forms to the email. All remaining supporting documents can be downloaded from the following link – https://ivyhousenv.sharepoint.com/:f/s/IVH/EoF5HILQuuJJhDbi578R9VUB1SfYkJLRQvGht6aVoT_TAA?e=0i7G55.

The application fee of £10,417 has been paid by BACS transfer (ref. PSCAPPWRIGH001) and included the following components:

- Base application fee for HCI waste transfer station 1.16.6 - £9,176
- Emissions Management Plan (Dust Management Plan) - £ 1,241

Could we please have an invoice or receipt issued to show payment?

The base application fee for HCI waste transfer station includes the assessment of Fire Prevention Plan (FPP) and Odour Management Plan. The proposed facility does not intend to accept any combustible waste and therefore, the Fire Prevention Plan is not required. Therefore, we would like you to consider replacing the FPP with the Emissions Management Plan (Dust Management Plan) and refunding the fee paid for the assessment of this plan, that is £1,241.

I would be grateful if you could confirm receipt of these documents and advise the name of the allocated permitting officer for the application.

Please do not hesitate to contact me if you have any questions.

Best Regards,

Justyna Krawczynska
