Schedule 6 reports

Schedule 6 reports were received for emergency releases of gas to atmosphere on 18 April, 28 April and 4 May 2014. Gas leaks were detected during routine maintenance and vents were opened to prevent an unsafe build up of gas.

It is considered that appropriate measures were taken to prevent the emission prior to it being detected and action was taken quickly to rectify the problem once it was noticed. There will be no compliance breach scored against this release of waste gas.

Report of emissions to air for the period 28/2/14 – 3/9/14

All values reported are within the Emission Limit Values stated within the permit. Correct parameters have been tested against and methods used correspond correctly with the permit.
