Inspection Report

The site is in the early process of being built presently so on talking to site management and looking at plans I advise the following until the site is fully completed on which another survey will be completed

The site consists of the following areas from site plan

- Office & weighbridge
- CHP Plant
- Waste receipt & deposit area
- Composting pad

The area is surrounded by farmland

Pest Activity:

Currently there are no known pest activity to this site, but the following could be attracted to the area,

- Rat
- Mice
- Rabbits
- Pigeons

Housekeeping:

Currently no Housekeeping issues due to being under refurbishment

Proofing & Recommendations:

None currently to recommend

Cost:

12 x visits per annum per annum This will include 2 free callouts per annum thereafter they are chargeable at £65 per visit plus vat	£780.00 per annum
---	--------------------------

All prices quoted exclude vat

Unless otherwise agreed, any contract or contract addition agreed is binding for one year and shall continue thereafter however a new Purchase order number will be required annually but may be terminated at any point with 3 months written notice by either party to the other and is in accordance with Goodwin Pest Management's Standard Terms & Conditions, a copy of which is available on request.

If you have any questions regarding this quotation or wish to proceed please contact me on:

email: simon@gpmpestcontrol.co.uk

Contract works

Routine service inspections

To undertake 12 planned maintenance inspections per annum.

To comply with changing EU regulations our work involved in controlling and preventing rodent activity has moved from high reliance on extensive use of rodenticides to more effort into environmental management of targeted pest populations. Each inspection will consist of:

- A visual inspection to all high-risk areas.
- Locate and check all monitors, traps and any rodent bait stations.
- Targeted treatment using appropriate pesticides when an infestation of specified pests is found as a result of the monitoring and inspection visits or as a response to client requests.
- Providing advice and recommendations on essential hygiene, housekeeping and proofing work required to support control of pests.

Pests covered

To provide a call out service against the specified pests listed below providing all hygiene and proofing recommendations have been carried out if not a cost can be applied to callouts coming from hygiene and proofing deficiencies:

Rats & Mice

If snap traps are used there is an indicator on the lid, should this indicator be present then the trap has been set off. We request that the site staff be vigilant and report this to GPM. We can provide training for your staff to be able to undertake intermediate inspections.

Emergency call-out response within 24 hrs

All emergency call outs, as requested by the customer, will be undertaken within 24 hours from notification. Emergency call outs will be classified as an active rodent or public health insect infestation, which is directly causing food contamination, or is active and present within public areas. All other requests will be dealt with within 72 hours from notification.

Confirmation of Order form

I confirm that I wish to proceed with the work as quoted in Goodwin Pest Management's Green waste compound, dated 9th October 2020 and agreement with attached general terms and conditions.

Ref: Comprehensive pest control services
