Key

- SRRP Planning Application Red Line Boundary
- Ecology Survey Area
- 1km buffer around Survey Area boundary
- 2km buffer around Survey Area boundary
- Local Nature Reserve (LNR)
- Ancient Semi-natural Woodland (ASNW)
- SSSI Impact Risk Zone

Non-statutory Designated Sites

- Local Wildlife Site (LWS)
- Potential Local Wildlife Site (pLWS)

The Site falls within a SSSI Impact Risk Zone (IRZ).

Within this IRZ Natural England would expect to be consulted on any planning proposal of the following type and scale:

* Livestock & poultry units with floorspace > 500m², slurry lagoons > 4000m².

* General combustion processes >50MW energy input. Incl: energy from waste incineration, other incineration, landfill gas generation plant, pyrolysis/gasification, anaerobic digestion, sewage treatment works, other incineration/ combustion.

Potential Local Wildlife Siites (pLWS) are sites that have been identified as having potential nature conservation interest, but that interest has not been fully assessed against the Wildlife Site Selection Guidelines. For some sites, the information suggesting they have nature conservation interest is old and may now be out of date and inaccurate.

Non-statutory designated sites information provided by Derbyshire Wildlife Trust (Derbyshire Biological Records Centre)
