# Application for an environmental permit Part B3.5 – Rearing of pigs or poultry intensively in an installation with more than 40,000 places for poultry or 2,000 places for production pigs (over 30 kg) or 750 places for sows

Please read through this form and the guidance notes that came with it.

You should only use this form if your intended activity is limited to rearing of pigs or poultry intensively in an installation with more than 40,000 places for poultry or 2,000 places for production pigs (over 30 kg) or 750 places for sows (as defined under <a href="https://www.legislation.gov.uk/">https://www.legislation.gov.uk/</a> uksi/2016/1154/contents).

If you want to carry out any other activities that would require a permit (such as an anaerobic digester) you will need to fill in the appropriate parts of the Environmental Permitting Regulations (EPR) application form.

The form can be:

- 1) saved onto a computer and then filled in.
- 2) printed off and filled in by hand. Please write clearly in the answer spaces.

Note: if you believe including information on a public register would not be in the interests of national security you must enclose a letter telling us that you have told the Secretary of State. We will not include the information in the public register unless directed otherwise.

Where you see the term 'document reference' on the form, give the document references and send the documents with the application form when you have completed it.

It will take less than three hours to fill in this part of the application form.

# 5 Supporting information

# 5a Provide a plan or plans for the site

We need a detailed site plan (or plans) showing:

- site location and the location of farm buildings and equipment (accurately drawn to scale, with a north-facing arrow)
- the installation boundary which should be clearly marked
- the plan must identify all of the land on which your activity takes place
- sources of emissions/releases (e.g. ventilation fans, incinerator, biomass boiler(s), heat exchanger(s), generator, slurry store)
- fuel and chemical storage (e.g. diesel, heating oil, LPG, pesticides, disinfectant and so on)
- the site boundary plan must be geographically correct (i.e. include fences, hedgerows or other features recognisable on site and should not be a schematic)
- site drainage (including clean and dirty water drainage routes, discharge points and site surfacing)

# 13 Confidentiality and national security

### **Confidentiality**

We will normally put all the information on the public register of environmental information. However we may not include certain information in the public register if this isn't in the interests of national security, or because the information is confidential (see the guidance accompanying this form which explains what we mean by confidentiality).

You can ask for information to be made confidential by ticking the box below and enclosing a letter with your application giving your reasons. If we agree with your request, we will tell you and not include the information in the public register. If we do not agree to your request, we will let you know how to appeal against our decision, or you can withdraw your application.

Please treat the information in my application as confidential

### **National security**

You can tell the Secretary of State that you believe including information on a public register would not be in the interests of national security. You must enclose a letter with your application telling us that you have told the Secretary of State and you must still include the information in your application. We will not include the information in the public register unless the Secretary of State decides that it should be included.

You can find guidance on national security in 'Environmental permitting guidance: core guidance', published by Defra and available via <a href="https://www.gov.uk">www.gov.uk</a>.

You cannot apply for national security via this application.

## 14 Declaration

If you knowingly or carelessly make a statement that is false or misleading to help you get an environmental permit (for yourself or anyone else), you may be committing an offence under the Environmental Permitting (England and Wales) Regulations 2016.

A relevant person should make the declaration.

Ensure a relevant person makes the declaration. A relevant person means each individual applicant (or individual trustee) who is applying for their name to appear on the permit; each person must complete this declaration so you will have to print a separate copy of this page for each additional individual to complete.

In the case of a registered company, this must be a person who is listed as a 'current appointment' at Companies House.

If you wish a manager or other employee to sign the declaration on behalf of the Company or Limited Liability Partnership (LLP) we will need a letter signed by a relevant person, that is an officer of the Company or a partner in the LLP confirming that the person has the authority to fill in the declaration.

In the case of a Limited Liability Partnership (LLP), it includes any partner.

An agent acting on behalf of an applicant is NOT a relevant person.

I declare that the information in this application is true to the best of my knowledge and belief. I understand that this application may be refused or approval withdrawn if I give false or incomplete information.

If you deliberately make a statement that is false or misleading in order to get approval you may be prosecuted.

Tick this box to confirm that you understand and agree with the declaration above
