

Non Technical Summary

1.0 INTRODUCTION

1.1 Scope

The Non-Technical Summary supports the Variation Application from a Standard Rules (2022 No. 1) (EPR/BB3300UM) to a Bespoke Environmental Permit by Welton Aggregates Limited, at Hibaldstow Quarry, Off Mill Road, Brigg, Lincolnshire, DN20 9NN.

The site currently operates under a standard rules permit (SR2022 No.1) for the treatment of non-hazardous and inert waste to produce soil, soil substitutes and aggregate. The permit variation aims to permit a physico-chemical treatment soil washing activity to operate at the site and for an increase in annual throughput volumes to 200,000 tonnes per annum. The permit boundary location is presented in drawing 243152/D/001, D002, and the detailed site layout in drawing 243152/D/006.

The accepted wastes and permit boundary do not change.

The application includes the Operational Plan (including waste acceptance and management controls), Dust Emissions Management Plan, Noise Management Plan and site plans.

The application is being treated as a Substantial Variation with additional dust and noise management plan assessments. The total application fee is £9,624.
