# Application for an environmental permit Part B3 – New bespoke installation permit

If you are applying for a new bespoke permit for an installation, fill in this part of the form, together with parts A, B2 and F1. Please check that this is the latest version of the form available from our website.

## Please read through this form and the guidance notes that came with it.

The form can be:

- 1 Saved onto a computer and then filled in. Please note that the form follows a logic that means questions will open or stay closed depending on a previous answer. So you may not be able to enter text in some boxes.
- 2 Printed off and filled in by hand. Please write clearly in the answer spaces.

It will take less than three hours to fill in this part of the application form.

#### **Contents**

- 1 What activities are you applying for?
- 2 Emissions to air, water and land
- 3 Operating techniques
- 4 Monitoring
- 5 Environmental impact assessment
- 6 Resource efficiency and climate change
- 7 Installations that include a combustion plant
- 8 How to contact us

Appendix 1 – Specific questions for the combustion sector

Appendix 2 – Specific questions for the chemical sector

Appendix 3 – Specific questions for the intensive farming sector

Appendix 4 – Specific questions for the clinical waste sector

Appendix 5 – Specific questions for the hazardous and non-

hazardous waste recovery and disposal sector

Appendix 6 – Specific questions for the waste incineration sector

Appendix 7 - Specific questions for the landfill sector

#### 1 What activities are you applying for?

Fill in Table 1a below with details of all the activities listed in schedule 1 of the Environmental Permitting Regulations (EPR) and all directly associated activities (DAAs) (in separate rows) that you propose to carry out at the installation.

Fill in a separate table for each installation you are applying for. Use a separate sheet if you have a long list and send it to us with your application form. Tell us below the reference you have given the document.

Document reference

EPB3 Version 9, Jan 2017 page 1 of 18

## Table 1a – Types of activities

Schedule 1 listed activities	;						
Installation name	Schedule 1 references (See note 1)	Description of the Activity (See note 2)	Activity capacity (See note 3)	Annex I (D codes) and Annex II (R codes) and descriptions	Hazardous waste treatment capacity (if this applies) (See note 3)	Non-hazardous waste treatment capacity (if this applies) (See note 3)	
Add extra rows if you need them. If you do not have enough room go to the line below or send a separate document and give us the document reference here	Put your main activity first			For installations that take waste only	For installations that take waste only	For installations that take waste only	
Directly associated activitie	es (See note 4)						
Name of DAA		Description of the DAA (ple	ase identify the schedule 1	activity it serves)			
Add extra rows if you need	them						
For installations that take w	vaste	Total storage capacity (See	note 5 below)				
		Annual throughput (tonnes each year)					

#### 1 What activities are you applying for?, continued

#### **Notes**

- 1 Quote the section number, part A1 or A2 or B, then paragraph and sub paragraph number as shown in part 2 of schedule 1 to the regulations.
- 2 Use the description from schedule 1 of the regulations. Include any extra detail that you think would help to accurately describe what you want to do.
- 3 By 'capacity', we mean:
  - the total incineration capacity (tonnes every hour) for waste incinerators;
  - the total landfill capacity (cubic metres) for landfills;
  - the total treatment capacity (tonnes each day) for waste treatment;
  - the total storage capacity (tonnes) for waste storage operations;
  - the processing and production capacity for manufacturing operations; or
  - the thermal input capacity for combustion activities.
- 4 Fill this in as a separate line and give an accurate description of any other activities associated with your schedule 1 activities. You cannot have DAAs as part of a mobile plant application.
- 5 By 'total storage capacity', we mean the maximum amount of waste, in tonnes, you store on the site at any one time.

#### Types of waste accepted

For those installations that take waste, for each line in Table 1a (including DAAs), fill in a separate document to list those types of waste you will accept onto the site for that activity. Give the List of Wastes catalogue code and description (search for 'Technical guidance on how to assess and classify waste' at www.gov.uk/environment-agency). If you need to exclude wastes from your activity or facility by restricting the description, quantity, physical nature, hazardous properties, composition or characteristic of the waste, include these in the document. Send it to us with your application form.

Ì	Please	nrovide th	e referen	ce for each	document.
	ricase	DIOVIGE III	e rereren	ce iui eacii	i uocumem.

You can use Table 1b as a template.

If you want to accept any waste with a code ending in 99, you must provide more information and a full description in the document.

Document reference for this extra information

## Table 1b – Template example – types of waste accepted and restrictions

Waste code	Description of waste
Example 02 01 08* 06 01 02*	Example Agrochemical waste containing hazardous substances Hydrochloric acid

#### 2 Emissions to air, water and land

Fill in Table 2 below with details of the emissions that result from the operating techniques at each of your installations. Fill in one table for each installation.

#### Table 2 – Emissions (releases)

Installation name								
Point source emissions to air	Point source emissions to air							
Emission point reference and location	Source	Parameter	Quantity	Unit				
Point source emissions to water (other than sev	vers)		I					

EPB3 Version 9, Jan 2017 page 3 of 18

#### 2 Emissions to air, water and land, continued

#### Table 2 - Emissions, continued

Emission point reference and location	Source	Parameter	Quantity	Unit
Point source emissions to sewers, effluent tre	atment plants or oth	ner transfers off site		
Emission point reference and location	Source	Parameter	Quantity	Unit
Point source emissions to land				
Emission point reference and location	Source	Parameter	Quantity	Unit

#### **Supporting information**

#### 3 Operating techniques

#### 3a Technical standards

Fill in Table 3a for each activity at the installation you have referred to in Table 1a above and list the relevant technical guidance note (TGN) or notes you are planning to use. If you are planning to use the standards set out in the TGN, there is no need to justify using them.

You must justify your decisions in a separate document if:

- there is no technical standard;
- the technical guidance provides a choice of standards; or
- you plan to use another standard.

This justification could include a reference to the Environmental Risk Assessment provided in part B2 (General Bespoke Permit) of the application form.

The documents in Table 3a should summarise the main measures you use to control the main issues identified in your risk assessment (search for 'Risk assessment for your environmental permit' at www.gov.uk/environment-agency) or technical guidance. For each of the activities listed in Table 3a, describe the type of operation and the options you have chosen for controlling emissions from your process.

EPB3 Version 9, Jan 2017 page 4 of 18

#### 3 Operating techniques, continued

#### Table 3a - Technical standards

Note: Fill in a separate table for each activity at the installation.

Installation name		
Schedule 1 activity or directly associated activity description	Relevant technical guidance or best available techniques as described in BAT conclusions under IED (see footnote below).	Document reference (if appropriate)

If appropriate, use block diagrams to help describe the operation and process. Give the document references you use for each diagram and description.

Document reference

#### 3b General requirements

Fill in a separate Table 3b for each installation.

#### Table 3b - General requirements

Installation name	
If the TGN or your risk assessment shows that emissions of substances not controlled by emission limits are an important issue, send us your plan for managing them	Document reference or references
If the TGN or your risk assessment shows that odours are an important issue, send us your odour management plan	Document reference or references
If the TGN or your risk assessment shows that noise or vibration are important issues, send us your noise or vibration management plan (or both)	Document reference or references

Search for 'Risk assessment for your environmental permit' at www.gov.uk/environment-agency.

#### 3c Types and amounts of raw materials

Fill in Table 3c for all schedule 1 activities. Fill in a separate table for each installation.

#### Table 3c – Types and amounts of raw materials

Installation name				
Capacity (See note 1 be	low)			
Schedule 1 activity	Description of raw material and composition material	Maximum amount (tonnes) (See note 2 below)	Annual throughput (tonnes each year)	Description of how the raw material is used including any main hazards (include safety information sheets)

#### Notes

- 1 By 'capacity', we mean the total storage capacity (tonnes) or total treatment capacity (tonnes each day).
- 2 By 'maximum amount', we mean the maximum amount of raw materials on your site at any one time.

EPB3 Version 9, Jan 2017 page 5 of 18

<sup>\*</sup>Directive 2010/75/EU of the European Parliament and of the Council of 24 November 2010 on industrial emissions (integrated pollution prevention and control)

#### 3 Operating techniques, continued

Use a separate sheet if you have a long list of raw materials, and send it to us with your application form.

Please also provide the document reference you have given the extra sheet.

Document reference

#### 3d Information for specific sectors

For some of the sectors, we need more information to be able to set appropriate conditions in the permit.

This is as well as the information you may provide in sections 5, 6 and 7.

For those activities listed below, you must answer the questions in the related document.

#### Table 3d - Questions for specific sectors

Sector	Appendix
Combustion	See the questions in appendix 1
Chemicals	See the questions in appendix 2
Intensive farming	See the questions in appendix 3
Clinical waste	See the questions in appendix 4
Hazardous and non-hazardous waste recovery and disposal	See the questions in appendix 5
Incinerating waste	See the questions in appendix 6
Landfill	See the questions in appendix 7

#### **General information**

#### 4 Monitoring

#### 4a Describe the measures you use for monitoring emissions by referring to each emission point in Table 2 above

You should also describe any environmental monitoring. Tell us:

- how often you use these measures;
- the methods you use; and
- the procedures you follow to assess the measures.

Document reference for this information

Yes □ Please go to Appendix 1 question 11.

#### 8 How to contact us

If you need help filling in this form, please contact the person who sent it to you or contact us as shown below.

General enquiries: 03708 506 506 (Monday to Friday, 8am to 6pm)

Textphone: 03702 422 549 (Monday to Friday, 8am to 6pm)

Email: enquiries@environment-agency.gov.uk
Website: www.gov.uk/environment-agency

If you are happy with our service, please tell us. It helps us to identify good practice and encourages our staff. If you're not happy with our service, please tell us how we can improve it.

Please tell us if you need information in a different language or format (for example, in large print) so we can keep in touch with you more easily.

EPB3 Version 9, Jan 2017 page 7 of 18

## Feedback

(You don't have to answer this part of the form, but it will help us improve our forms if you do.) We want to make our forms easy to fill in and our guidance notes easy to understand. Please use the space below to give us any comments you may have about this form or the guidance notes that came with it.			
How long did it take you to fill in this form?	L		
We will use your feedback to improve our forms and grade simpler.	uidance notes, and to tell the	Government how regulations	could be
Would you like a reply to your feedback?

#### Appendix 6 – Specific questions for the waste incineration sector

If you are proposing to accept clinical waste please also fill in questions 1, 2 and 3 of appendix 4 above. Do you run incineration plants as defined by Chapter IV of the Industrial Emissions Directive (IED)? No \( \square\) You do not need to answer any other questions in this appendix Yes | IED applies 1b Are you subject to IED as an incinerator or co-incinerator? As an incinerator As a co-incinerator Do any of the installations contain more than one incineration line? No ☐ Now go to section 4 Yes □ 3 How many incineration lines are there within each installation? Fill in a separate table for each installation Installation reference Number of incineration lines within the installation Reference identifiers for each line You must provide the information we ask for in questions 4, 5 and 6 below in separate documents. The information must at least include all the details set out in section 2 ('Key Issues') of S5.01 'Incineration of waste: additional guidance' (under the subheading 'European legislation and your application for an EP Permit'). Describe how the plant is designed, equipped and will be run to make sure it meets the requirements of IED, taking into account the categories of waste which will be incinerated Document reference Describe how the heat created during the incineration and co-incineration process is recovered as far as possible (for example, through combined heat and power, creating process steam or district heating) Document reference Describe how you will limit the amount and harmful effects of residues and describe how they will be recycled where this is appropriate Document reference For each line identified in question 3, answer questions 7 to 13 below Question 3 identifier, if necessary Do you want to take advantage of the Article 45 (1)(f) allowance (see below) if the particulates, CO or TOC continuous emission monitors (CEM) fail? No  $\square$ Yes 🗌 This article allows 'abnormal operation' of the incineration plant under certain circumstances when the CEM for releases to air have failed. Annex VI, Part 3(2) sets maximum half hourly average release levels for particulates (150mg/m³), CO (normal ELV) and TOC (normal ELV) during abnormal operation. Describe the other system you use to show you keep to the requirements of Article 13(4) (for example, using another CEM, providing a portable CEM to insert if the main CEM fails, and so on).

EPB3 Version 9, Jan 2017 page 15 of 18

## Appendix 6 – Specific questions for the waste incineration sector, continued

<b>monito</b> Under th	you want to replace continuous HF emission monitoring with periodic hydrogen fluoride (HF) emission ring by relying on continuous hydrogen chloride (HCl) monitoring as allowed by IED Annex VI, Part 6 (2.3)? is you do not have to continuously monitor emissions for hydrogen fluoride if you control hydrogen chloride and keep it to a ow the HCl ELVs.
	Please give reasons for doing this
.03 🗀	
	you want to replace continuous water vapour monitoring with pre-analysis drying of exhaust gas samples, as I by IED Annex VI, Part 6 (2.4)?
Under th before th	is you do not have to continuously monitor the amount of water vapour in the air released if the sampled exhaust gas is dried ne emissions are analysed.
No 🗌	
Yes 🗌	Please give your reasons for doing this
monito	you want to replace continuous hydrogen chloride (HCl) emission monitoring with periodic HCl emission ring, as allowed by IED Annex VI, Part 6 (2.5), first paragraph?
pollutan	is you do not have to continuously monitor emissions for hydrogen chloride if you can prove that the emissions from this t will never be higher than the ELVs allowed.
No 🗆	
Yes 🗌	Please give your reasons for doing this

EPB3 Version 9, Jan 2017 page 16 of 18

## Appendix 6 – Specific questions for the waste incineration sector, continued

<b>D Ann</b> nder thi	you want to replace continuous HF emission monitoring with periodic HF emission monitoring, as allowed by ex VI, Part 6 (2.5), first paragraph? is you do not have to continuously monitor emissions for hydrogen fluoride if you can prove that the emissions from this twill never be higher than the ELVs allowed.
	Please give your reasons for doing this
onitor	you want to replace continuous $SO_2$ emission monitoring with periodic sulphur dioxide $(SO_2)$ emission ing, as allowed by IED Annex VI, Part 6 (2.5), first paragraph?
llutant	is you do not have to continuously monitor emissions for sulphur dioxide if you can prove that the emissions from this will never be higher than the ELVs allowed.
