Hi Andy – yes the water treatment chemicals are relevant and this is described in the application for the cooling water supply (can't remember the exact section). Some of the CoSHH assessments provided include these chemicals.

Kind regards,

Helen

Helen

Thanks for this – hope you had a great week off.

I suspect these will be fine at this stage - but will have a look through and confirm.

In the meantime, I think the only other thing outstanding is Q2 of my initial email in the trail below (*.....please clarify whether the “water treatment chemicals” (row 6 of the table identified above) are relevant to this specific application*). Could you please clarify whether they are – or not ?

Andy

Hi Andy,

Sorry I have been away on holiday this week, and so am only providing these today. I note that these are not actually MSDSs, but rather COSHH assessments. However, they do contain the hazard classification for the substances, so it may provide the information required?

I'll go back to the site and request actual MSDSs, but will these suffice in the meantime?

Kind regards,

Helen

Helen

Thank you – that's great.

Sorry – a minor error in my email.....I will have to wait until I've received the data to duly make – but – what I can do in the meantime, on the back of your email – is now ask our air quality modelling colleagues to verify the dispersion model. And this is the part of the process that can slow things down, as they also have quite a big work queue – but I can now get it on the queue, even though it's not yet duly made.

Hope that makes sense - sorry – my mistake – but the main thing is it can be moving along.

Andy

Thanks Andy.

I can confirm that is acceptable and thank you for speeding things up for us. I will endeavour to get the requested information from the client and to you for the 14th April. If there are any issues with this, I'll let you know as soon as I can.

Kind regards,

Helen

Hi Helen

As we just discussed – I will still need this information. But, considering the nature and high quality of the rest of the application, I can justify moving it along in the background without it - as long as we can agree a date that you will provide the information by.

With that in mind – would you be happy to agree that you will submit your response to the outstanding issues to me by, say, the end of Friday 14th April ?

If you are happy to agree to this, I can progress the process of formally duly making the application in the meantime – which I hope will be helpful to you / your client ?

Andy,

Please find the model files requested attached.

I have asked the other questions of the site, and will get back to you as soon as I can.

Kind regards,

Helen

Hi Helen

Thanks for the chat this morning – and for your patience with this application.

I am pleased to confirm that the application has now been allocated to me to progress. I would be grateful if you could respond to the following 3 points, as we discussed this morning :

- 1 Could you please provide the relevant “Material Safety Data Sheets” (MSDS) for the substances identified in Table 4.1 of the Site Condition Report (pg 46 of the “*Application Bespoke VPI-A_Main Supporting Document*”) – specifically :
 - “diesel” (row 1, 2)
 - “cooling water with antifreeze” (row 3)
 - “lubrication oil” (row 4, 5)
- 2 Could you please clarify whether the “water treatment chemicals” (row 6 of the table identified above) are relevant to this specific application ? If they are, can you please explain briefly which part of the process they specifically apply to - and provide all relevant MSDS accordingly.

- 3 I don't appear to have the data input files which were used for the dispersion model (ref the "Appendix E - Air Quality Assessment" submitted in support of the application). Apologies if these have slipped through the net from our side – but, either way, I would be grateful if you could provide them to me directly as we discussed ?

Thanks for your help with this Helen.

I look forward to receiving your response – which will inform the decision making process regarding the duly making aspects of the application.

Hi Helen

Good to chat briefly today.

As mentioned, just a couple of things that I think may be missing from the application that I've picked up, as part of the duly making checks.

It would be useful to chat these through I think first – before requesting more formally – just to make sure the info isn't buried somewhere in the application that I haven't seen / found.

Would you be free for a quick Teams call at 1100 tomorrow maybe ? Shouldn't take long ?

Andy
