Dylan,

Following the additional information you provided on 27 March – the recovery assessment has been completed and we agree that the activity is recovery.

Since then we have been assessing the technical parts of the application and hope to provide you with an update on progress with that in the near future.

Kind regards

Tamara

Tamara,

Is there any update with regards to the waste recovery application for Skelbrooke?

Regards

Tamara,

The final surface of the restored quarry will include areas restored to establish vegetation as per the approved scheme of restoration. This will require the upper 0.5m to be restored with suitable topsoil materials. It is proposed that suitable soils will be identified and deposited without the requirement to use other wastes to improve the quality of the growing medium. Should any such requirements be identified as the restoration scheme progresses the appropriate regulatory consents will be put in place, as necessary.

Good afternoon Dylan,

As part of the Deposit versus recovery assessment - please can you confirm the response to  [Form C4](#), Appendix 2, question 8b regarding the R10 activity and that this does not include the spreading of waste to improve the quality of the growing medium (e.g. soil conditioner to improve existing soil profile).

If this is correct this confirms that you do not need a benefits statement.

Thank you and kind regards

Tamara
