Dear Sir

PERMIT APPLICATION
CHLOROS ENVIRONMENTAL LTD
UNIT 145, ELM DRIVE, HATLEBURY TRADING ESTATE, DY10 4JD

Further to your email of 5 December in response to the application of 10 October. The additional information you requested is attached along with this letter to 3 emails. The bulking procedure is in the Process Flow Diagrams 3922-2385-PFD as is the compaction procedure. I have include two specifications which show wastes are blended for customer requirements if you require additional specifications they are available.

The documents submitted are:-

- 1) A revised EMS detailing the operating techniques and modified pre-acceptance procedures requested.
- 2) A dust management plan is attached I would point out that dusty wastes are handled only within their original containers which are only opened if a sample is required for lab checks.
- 3) An odour management plan is also attached.
- 4) Emergency Procedure CEE004 detailing site spillage response
- 5) Emergency Spillage Procedure For Vehicle CEE006 (for information)
- 6) Container Washing Procedure CESM010
- 7) Specification for non-halogenated solvents
- 8) Specification for oils

Payment of the additional £2487.00 will be made by bank transfer to the account detailed on form F using the Payment code PSCAPPCHLOR002

I trust this information is sufficient and look forward to the permit application being duly made.

Yours faithfully,

R G A Draper
