Table 3C – Types and amounts of raw materials including justification for use and avoidance of waste.

Installation name		Unit 145, Hartlebury Trading Estate			
Capacity					
Schedule 1 activity	Description of raw material and composition of raw material	Maximum amount daily (Tonnes)	Annual throughput	Description of how raw material is used including main hazards	Justification for use (Form B3 Q6d)
5.3 part A(1)(a)(ii) A(1)(a)(iii) A(1)(a)(iv) 5.6 A1(a)	Water	0.5	100	Water is used for steam, washing and cleaning, of empty containers. Where it is suitable, recycled treated water is used..	The site aims to use water as efficiently as possible and is constantly seeking the most efficient systems
5.3 part A(1)(a)(ii) A(1)(a)(iii) A(1)(a)(iv) 5.6 A1(a)	Packaging	0.1	15	Used for bulking materials either into larger containers whilst retaining original packaging or transferring into bulk containers max vol 1,000l	The operator has invested in systems to ensure the packaging used is suitable for containing the materials being bulked for onward transport. Containers are cleaned and re-used wherever possible

The company are committed to pushing the wastes they handle and produce as far up the waste hierarchy as possible and the specialisation in low volumes of difficult to handle wastes has given a particular emphasis to this ethos. The bulking of these wastes increases the likelihood of recycling or recovery as it creates a more economic quantity for customer's to process.
