## **Appendix 19 – Site Drainage and Infrastructure**

| <b>SITE DETAILS</b> |  |
|---------------------|--|
| Operators Name:     | Morris Recycling Limited                             |
| Site Name:          | Morris Recycling                                     |
| Address:            | Unit 34 Coneygree Industrial Estate, Tipton, DY4 8XP |
| Grid Reference:     | SO 95764 90998                                       |

Below is a summary of the site drainage and infrastructure at the above site, please see drawing no.5 Site Drainage Plan for illustration.

### Office and site – WC

- Foul connection to local sewerage treatment works.

### INTERNAL – Buildings

#### Drainage

- There are no drains internally in the buildings.
- Roof water runs off existing gutters and drainpipes down the side of the small unit and large unit warehouse building which connects to the surface water system.

#### Infrastructure

- Impermeable pavement internally

### EXTERNAL – Waste Storage Bay Area

#### Drainage

- Uncontaminated waste is stored in external yard areas. Uncontaminated waters from external yard area runs to surface water drainage. Waters run through Class 1 full retention interceptor before final discharge.
- Emergency lock off – Surface Water –manhole (MH S2) fitted with manual open/close penstock that has rotating key closing mechanism.

#### Infrastructure

- Impermeable pavement

### EXTERNAL – Non-Waste Storage Area

Non-waste storage area i.e pellet is stored in the external yard area or large warehouse building.

#### Drainage

- Surface water run off

#### Infrastructure

- Impermeable pavement
