1 Introduction

1.1 This Non-Technical Summary (NTS) accompanies a bespoke permit application on behalf of A&P Skips Limited (the operator).

1.2 The site is situated at Morson Road, Enfield, EN3 4NQ.

- The site is proposing to accept, store and treat household, industrial and commercial (HIC) and Construction, Demolition & Excavation (CDE) wastes.

1.3 The site is bordered to the north by the Amazon EV Park and DHL supply chain with several other industrial commercial uses beyond. East of the site are other industrial activities with a concrete waste facility beyond. South of the site is recreational grounds and immediately to the west of the site is a railway line with commercial & residential properties beyond.

2 Application proposals

- 2.1 A&P Skips Limited will hold and operate an Environmental Permit (EP) for the 1.16.6 - household, commercial and industrial waste transfer station as defined on Table 1.16 'Waste Treatment'; Section 1.16.6; Schedule page 31 of "Tables of Charges The Environment Agency (Environmental Permitting) (England) Charging Scheme 2022"
- 2.2 The permit will largely be based around a combination of the Environment Agency's (EA's) SR2015 No.6 but will be bespoke due to:
- The site is within 500m of a SSSI;
 - The site is looking to accept EWC code 19 12 12 with the description "other wastes (including mixtures of materials) from mechanical treatment of wastes other than those mentioned in 19 12 11" which is not listed on standard rules permits; and,
 - Non-specified waste may be stored in secure open storage bays as opposed to just secure containers.
- 2.3 The annual throughput of the site is proposed to be <75,000 tonnes per annum.
- 2.4 The proposed storage quantities of the site will be governed by the EMS and FPP and not as part of the EP conditions.
- 2.5 The proposed activities have been defined below in an EA formatted table for ease of reference:

Description of activities for waste operations	Limits of activities
Household, commercial & industrial waste transfer station with treatment.	
<p>D15: Storage pending any of the operations numbered D1 to D14 (excluding temporary storage, pending collection, on the site where it is produced)</p> <p>R13: Storage of wastes pending any of the operations numbered R1 to R12 (excluding temporary storage, pending collection, on the site where it is produced)</p> <p>D14: Repackaging prior to submission to any of the operations numbered D1 to 13</p> <p>D9: Physico-chemical treatment not specified elsewhere in Annex IIA which results in final compounds or mixtures which are discarded by means of any of the operations numbered D1 to D8 and D10 to D12</p> <p>R3: Recycling/reclamation of organic substances which are not used as solvents</p> <p>R4: Recycling/reclamation of metals and metal compounds</p> <p>R5: Recycling/reclamation of other inorganic materials</p>	<p>Treatment consisting of manual and mechanical sorting, separation, screening, baling, wrapping, shredding, granulating, crushing, blending or compaction of waste into different components for disposal (no more than 50 tonnes per day) or recovery.</p>

4 Documentation and fees

4.1 This application constitutes a New Bespoke Permit Application as per section 1.16.6 of the charging guide.

Table 4.1 – Base Application Fee Table

Charging Scheme Ref	Charging Scheme Ref & Description	Type of application (Ref)	Fee
1.16.6	Household, commercial and industrial waste transfer station.	New Bespoke Permit	£9,176

4.2 The site is located within an established industrial/commercial Industrial Area/Business Park with numerous storage and distribution uses such as the Amazon EV Park and DHL Supply Chain immediately to the North of the site and additional industrial uses such as Euromix and Plant Hire sites to the east and northeast. These sites would be expected to generate a significant level of noise through the high number of HGV movements and onsite industrial processes.

4.3 In addition, the A1055 is located directly to the west of the site.

4.4 All incoming mixed wastes will be tipped within the waste transfer building which will contain noise from the facility and reduce noise levels beyond the site boundary. Furthermore, the nearest residential receptor is approximately >130m from the site (with a railway line and the A1055 in between) which, with the immediate screening of the site, is not considered to be within the zone of influence for the regulated facility.

4.5 The adjacent operations will typically be operating before and after the hours of operation for the regulated facility and will therefore not be affected by the activities carried out on site.

4.6 The proposed operations would not be considered out of context within the existing noise climate from an acoustic point of view.
