

Appendix 8 Raw Material Inventory

The inventory is kept with the accident management plan.

Inventory of Raw Materials	On approved lists – Defra or HSE (Pesticides Blue Book)	Maximum Quantity used (litres or kg per year)	Maximum Quantity stored on site (litres or kg) at any one time
a) Biocides (includes disinfectants, wood preservatives, slimicides)			
Disinfectants	Yes (Defra approved)	200kg	25kg
Wood preservative	Yes (HSE)	20 litres	20 litres
b) Pesticides (including herbicides, vertebrate control products, biological pesticides)			
Rodenticide	Yes (HSE)	40kg	None - brought by contractor
Insecticide	Yes (HSE)	2 litres	1litre
c) Veterinary medicines (excluding dietary additives)			
IB Vaccine	n/a	As prescribed	none
Gumboro Vaccine	n/a	As prescribed	none
d) Bedding types			
Wood shavings	n/a	50 tonnes	10 tonnes
Chopped Straw	n/a	50 tonnes	10 tonnes
e) Fuels and Oils			
Petrol (for mower/trimmer)	n/a	50 litres	10 litres

The inventory will be reviewed every 4 years and updated if alternative products are available.

Water usage is monitored throughout the crop cycle and records are kept. Water is tested for potability every 6 months with quality issues acted upon immediately. Within two years of being granted an EPR permit, the operator will conduct a water efficiency audit in accordance with the SGN EPR6.09 'How to comply with your environmental permit for intensive farming'.

Avoidance, Recovery and disposal of wastes

Within 2 years of the permit being granted, a waste minimisation review will be undertaken to identify whether appropriate measures to ensure that minimal waste is produced need to be updated and changed.
