

## Parkham Farms Limited, Parkham Farms Cheese Factory, Permitted Activities, February 2026

Table 1 details the proposed Listed Activities under Schedule of the Environmental Permitting (England and Wales) Regulations 2016 and Directly Associated Activities at Parkham Farms Cheese Factory Installation site.

*Table 1 – Proposed Listed & Directly Associated Activities*

Permitted Activities	Description of Activity	Limits of activity
<b>Listed Activity</b> – Schedule 1 of the EPR under Section 6.8 Part A(1)(e)	Treating and processing milk, the quantity of milk received being more than 200 tonnes per day (average value on an annual basis).	<p>Cheese manufacturing from receipt of raw materials to dispatch of finished products and waste.</p> <p>Maximum milk acceptance capacity – <b>810,000 Litres</b> ( combined capacity of the 6 No. raw milk silos).</p> <p>Processing capacity - <b>396,000 litres / 408 tonnes per day</b> ( based on 18 vats, each with a capacity of 22,000 litres = 396,000 litres. Applying a milk density of 1.0297)</p> <p>Finished products– based on a daily processing input of approximately <b>408 tonnes of milk</b>, the total daily production output is expected to be in the region of <b>203 tonnes</b>.</p>
DAA – Steam supply	The operation of 2 No. boilers fuelled by kerosene to produce steam for cleaning and pasteurisation.	From storage of fuel to emission of combustion gases.
DAA - Cleaning	Cleaning- in-place systems	The cleaning of storage and production areas, associated equipment and vehicles.
DAA – Use of refrigerants	Use of refrigerants in cooling, chilling and/or freezing systems at the installation.	The storage and handling of refrigerants and the operation of refrigeration plant

<b>Permitted Activities</b>	<b>Description of Activity</b>	<b>Limits of activity</b>
DAA – Storage of raw material	This activity relates to storing raw materials.	Raw materials will be stored securely, away from vehicle impact and with secondary containment as appropriate.
DAA - Oils and chemicals storage	Storage of oils and chemicals on site in dedicated areas	From receipt of raw materials to disposal of wastes arising.
DAA- Waste storage, handling and dispatch	Storage and handling of waste materials	The storage and handling of liquid and solid wastes associated with the processing of raw whole milk and production of cheese, whey permeate concentrate, lactose and cream.
DAA - Lorry wash	Lorry wash	The storage, handling and disposal of liquid wastes and cleaning chemicals associated with the cleaning of vehicles onsite.
DAA - Emergency back-up generator	Emergency back-up generator	Emergency back-up generator operated for the purpose of testing for no more than 50 hours per year and no more than 500 hours operation in an emergency.
DAA - Surface water collection, storage and discharge	Collection and discharge of clean surface water.	Collection of rainwater from building roofs and clean external concrete areas.  Discharge of water to the tributary of the Dipple Water.
