

## Revision of Operating Techniques

The table below contains our current Operating Techniques.

<b>Description</b>	<b>Parts</b>	<b>Date Received</b>
Application	Application forms C2 and C3 and referenced supporting information	18/01/17
Response to additional information request, dated 24/02/17	Environmental Management System (Ref EC -EMS-E) Response to question 3 detailing raw materials storage area and leek prevention measures. Response to question 6 detailing the digestate drier and operation procedures. Response to question 10 regarding the gas upgrading unit operating time. Response to question 13 annual waste throughput.	24/02/17

Following this variation, these Operating Techniques will change. The changes our outlined below -

1. Parts C2 and C3 sent as part of the last variation application (to vary permit no EPR/QP3832RZ) will be superseded by forms C2 and C3 contained within this current variation application.
2. The Environmental Management system (Ref EC-EMS-E) is superseded by the EMS that accompanies this variation application (Ref – Gorst Energy EMS)
3. Any reference to waste throughput in the operating techniques e.g. ‘Response to question 13 annual waste throughput) to be supersede by waste throughput figures referenced in the EMS (Ref – Gorst Energy EMS) and in the non-technical summary.
4. The odour Management Plan has been superseded by the OMP accompanying this application (document ref EC-OMP-E version 4). The odour Management Plan is a working document, updated on a regular basis. As such, the version reference will change as it is updated.
5. The Noise Management Plan is a working document and the reference title will change for this document regularly as it is updated (current reference - 416.06679.00001\_NMP).
