Hi [REDACTED]

12-digit NGRs for Maer Road SPS and Phear Park SPS below. I think this should be everything. If you think anything is missing, please let me know.

Phear Park SPS

Outlet: SX 99957 81464

Effluent Sample Point: SY 00586 81552

EDM: SY 00588 81528

FPF: SY 00588 81528

Site NGR: SY 00585 81522

Overflow NGR: SX 99957 81464

Maer Road SPS

Outlet: SY 01177 79643

Effluent Sample Point: SY 01014 80073 – This one is quite different to what was previously submitted. I've checked back against our GIS system and the site plan we provided with the application. I believe this is the correct NGR as it matches what I can pinpoint based on the site plan. No change needed to site plan. Old NGR for reference SY 0108 7999

EDM: SY 01013 80074

Site NGR: SY 01180 80209

Kind regards

Afternoon [REDACTED]

Following changes surrounding submission of National Grid References, the operator is now required to submit 12 figure NGRs as part of permit applications. Please could you supply an updated list of 12 figure NGRs for the Exmouth applications. This should include the straight point outfall as 12 figure NGR as well as all other NGRs to be included in the permit such as FE sample point, EDM point and MCERTS flow monitoring etc.

Additionally, there has been a request made for information from the team consulting on the infiltration assumptions. Please could you confirm when the sewage rehabilitation works were carried out within the network and what works were carried out, as the only information we have is the 2023 data which was prior to the infiltration measures.

Thank you,
