Hi Tim.

The operator has decided to remove the proposed storage of asbestos from the proposed operations. Therefore, please find attached copies of all the relevant updated permit application documents which now has reference to this removed.

I have attached a copy of the updated Part B4 form including all the proposed recovery and disposal codes.

Please find attached a copy of the updated Environmental Risk Assessment which has a section at the end of the table which referencing protected species and habitats. Please also see the attached WAMITAB certificate.

Finally, as the operator is not proposing to accept asbestos waste anymore, it is considered the fee for the hazardous waste transfer station is no longer required, therefore just the additional fee for the habitats assessment (£779) has been made.

If you require anything further, please let me know.

Many thanks

Emma

- 4. The site is in proximity to a protected species (Code 2) please provide an updated Environmental Risk Assessment addressing potential harm to this species through operations or attraction of predatory species to the location.
