Hi Rebecca

Have reattached the climate risk assessment  
Site plan updated with bird numbers  
Tech standards describing aviary systems in both houses with litter belt removal

Regards

Steve

Good morning Steve,

I have now completed the duly making checks for the above permit. Unfortunately some things are missing from your application. Please address the following below:

- Climate Change Risk Assessment – In the Application Farm Section *6b Climate change risk screening* you have indicated that a risk assessment is required for the site however the risk assessment document is missing from your application
- Housing – there are no details in the application regarding the housing type for the free range poultry. The pre-application ammonia screening was based on an aviary system. Please confirm if this is the case and provide further details about the housing technical standards. Please also indicate on the site layout plan which is House 1 and House 2 (split of poultry numbers?).

Please provide the above information within 10 working days. If you have any questions please let me know.

Kind regards,

Rebecca

Good morning Steve,

This is a quick email to let you know that I have been allocated the above permit application. I will do my best to ensure you get your permit determined as quickly as possible. I'll start looking through the application documents this week and will let you know if there is anything further I need before we accept the application as complete.

In the meantime I can be contacted using the details below.

Kind regards,

Rebecca
