Subject: RE: Environmental permitting application EPR/FB3002KD/A001 is duly made

Dear PSC Waste

Following consultation with the inspecting officer Debbie Valentine for the proposed digestate dryer Two Hoots Farm on the 15th November 2018, the proposed site boundary for this application has been revised to include an underground digestate pipeline and the connection to the digestate storage tank.

As such please find attached a revised site boundary plan for this permit application (Drawing number ETL-263-JAS-00186-EPR-03, Revision B). Please add this plan to the permit application documents with a note to make it clear that it supersedes Drawing number ETL-263-JAS-00186-EPR-03, Revision A.

Many thanks

Best Regards
