

Justification

Bromtrees Hall Farm Poultry Unit currently consists of 7 poultry houses which have been rearing an average of 38974 stags per cycle.

Due to market requirements operator wishes to change from stag turkeys to broiler rearing, 370000 places in ten poultry houses.

Details of placements over the last 5 years has been submitted and detailed NH3 modelling demonstrates that the proposed change to broiler rearing will show a reduction in emissions to all protected sites over the existing rearing of stag turkeys.
