

F-Gas Summary

Table 1 below presents the F-Gases present at H Weston & Sons Ltd, The Bounds.

Table 1: F- Gas Summary

Unit Identifier	Refrigerant Gas	Charge (kg)	GWP of F-Gas
Blending Chiller	R410a (phase out)	43	2088
Bottling No 1	R410a	30	2088
Bottling No 2	R410a	56	2088
Evaporator	R407c	45	1774
Kegging Chiller	R410a	40	2088
Six Ways	R407c	43	1774

All of the above units sit within downstream directly associated activities (blending, bottling) within the site. There is no refrigeration or chilling units associated with the listed activities as these are carried out at ambient temperatures.

All units are leak checked to the standards required by the F-Gas Regulations and are also maintained by competent and appropriately qualified refrigeration engineers.

H Weston & Sons Ltd are aware of the phase out scheduled for R410a and will work towards alternatives for this gas within their systems.

The site layout plan K499.2~09~1302 shows the areas in which the unit identifiers can be found.
