

## Appendix 9: Odour Management Plan (Cedarwood Farm)

Dated 27/05/20

This plan has been prepared to form part of the EPR permit application to take into account the neighbouring dwelling which is situated in the immediate area of Saltaugh Grange.

The table below highlights odour related issues created from the site and their potential risks or problems. The action taken to minimise the odours is then documented with the completion date, if applicable.

<b>Odour Related Issue</b>	<b>Potential Risks and Problems</b>	<b>Action Taken to Minimise Odour Risks</b>	<b>Completion Date</b>
Delivery of feed	<ul style="list-style-type: none"><li>• Creation of dust during delivery</li></ul>	<ul style="list-style-type: none"><li>• Feed is delivered in covered bulker unit</li></ul>	In place
Feed Storage	<ul style="list-style-type: none"><li>• Dust produced from feed storage on site</li></ul>	<ul style="list-style-type: none"><li>• Feed storage bins are completely enclosed</li></ul>	In place
Ventilation system within houses	<ul style="list-style-type: none"><li>• Inadequate ventilation design causing poor dispersal of odours</li></ul>	<ul style="list-style-type: none"><li>• Poultry houses align with 'best practice' ventilation systems ensuring efficient removal of odours</li><li>• Manure is removed from the houses on a weekly basis and fully emptied at end of laying cycle. All muck removed immediately from site – no dust created during process.</li></ul>	In place

Odour Related Issue	Potential Risks and Problems	Action Taken to Minimise Odour Risks	Completion Date
Manure management	<ul style="list-style-type: none"> <li>• Odours created from removal of manure from sheds</li> <li>• Odours created from removal of manure from site</li> </ul>	<ul style="list-style-type: none"> <li>• Manure is removed from houses by belt-clean weekly at fully at the end of laying cycle using mechanical loading shovel</li> <li>• Manure is emptied directly into trailers from and removed from site immediately</li> </ul>	In place
Mortality management	<ul style="list-style-type: none"> <li>• Odours created from inadequate management of mortalities on site</li> </ul>	<ul style="list-style-type: none"> <li>• Bird mortalities are removed immediately from houses</li> <li>• Carcasses immediately placed in temperature controlled container (freezer) on site whilst awaiting collection for incineration</li> </ul>	In place
House clean out	<ul style="list-style-type: none"> <li>• Dust produced from 'clean-down' operation</li> </ul>	<ul style="list-style-type: none"> <li>• Clean-down operation is carried out using power wash system ensuring minimal dust produced</li> </ul>	In place
