

## **White House Farm**

The installation at White House Farm will be able to meet the new BAT AEL'S

A nutritional strategy will be employed reducing the levels of N and P

This will be verified by means of manure analysis and reported annually along with dust emissions based on the standard emission factor for broilers.

On a daily basis, odour levels at the installation will be monitored for high housekeeping odours.

### **Housing Review**

The poultry houses at White House Farm are at BAT, houses have impermeable floors, high levels of insulation and are equipped with roof mounted fans and side wall inlets, ventilation is computer controlled.

### **Drainage Review**

All clean roof water from poultry houses is directed to French drain soakaways with outlets to ditch. Clean yard water is directed to soakaway.

Dirty water during wash down is directed to underground dirty water tanks and lagoon, yard washing during cleaning is directed to dirty water tank/lagoon.
