

Proposed Changes

Operator at White House Poultry Farm is proposing to construct two new poultry houses.

The expanded installation will consist of six poultry houses, for the production of broilers, bird place numbers will be increased to 280,000.

The additional biomass boiler proposed in the last variation will be changed to a larger biomass boiler using straw as fuel.

Installation boundary will increase to accommodate the expansion.

Pre-application report has identified that the proposed expansion will have no adverse effect on any nearby protected sites.

Revised boundary/layout/drainage plan submitted.
