

WASTE REVIEW ACTION PLAN

PESTICIDES:

- Ensure tight stock control
- Maintain a tidy unit (e.g maintained buildings and drains, reduced cover and breeding sites) and prevent access to feed, to reduce requirement for pesticides and rodenticides
- Design of site, with enclosed food and drainage systems, reduces attractions to potential pests and helps to exclude them
- Slurry storage and store monitored for signs of pests. Slurry removed regularly.

FEED RESIDUES:

- Delivery driver instructed to clear up any spills
- Targeted diets fed according to pig weight and requirements, reduces waste.

VET PRODUCTS:

- Continue to keep tight stock controls
- Return unused medicines
- Increased biosecurity and pig health, should help reduce the requirement for veterinary medicines.
- Red Tractor requirement to monitor overall antibiotic use and report (quarterly) on the electronic medicine book (eMB) service.

FALLEN STOCK:

- Deadstock stored in purpose-built, lockable container. Licenced deadstock collector removes fallen stock- Lawlors deadstock.

SCRAP:

- Minimal scrap production expected. Scrap sold for recycling to Garton Scrap works

OILS, TYRES, BATTERIES etc:

- No change.
- Disposed of when applicable according to manufacturer's instructions

AGROCHEMICALS:

- Used, stored and disposed of by Brunton waste disposal

BUILDING RESIDUES:

- Old blocks and bricks waiting to be crushed and re-used in concreting projects

WASTE LIQUIDS:

- Used foot dips: emptied into reception pit
- Rainwater:
 - all gutters maintained
 - diverted into clean water drainage routes
 - Consider plans to capture roof run-off.
