Dear Sir/Madam

**Beckton Combustion Facility - variation to existing Environmental Permit
EA/EPR/PB3238RK/V002**

Please find enclosed an electronic copy of Thames Water Utilities Limited's (TWUL's) application for a normal variation to the bespoke environmental permit for the Beckton Combustion Facility (ref EA/EPR/PB3238RK/V002). The application contains all the relevant application forms (Parts A, C2, C3 and F1) and the Supporting Information Document with appendices. The application fee payment is by BACS (from Thames Water Utilities Limited, BAC Ref 2002075483).

TWUL requests determination of the enclosed application on the earliest possible timescale.

Subject to application approval, TWUL would like to request a draft permit for review.

It is important to note that the 'relevant person' entered under 'Section 6. Declaration' on Form F1, reflects a previously agreed approach to all such application declarations between TWUL and the Environment Agency. Reference: TWUL's letter of 19-6-2014 to Martin Swift (Environment Agency) from Joel Hanson (General Counsel & Company Secretary, TWUL), "Delegated approach for Environmental Permitting applications" and associated "Appendix A – Employees with EPR delegated authority for Thames Water Utilities Limited". This was updated by TWUL's letter of 19/1/2015 to the Permitting Support Centre (c/o Zoe Bingley) from David Hughes (Company Secretary) to reflect a change in responsibilities at TWUL **and is now revised by a further letter, to the same contacts, of 23-4-2015.**

We understand that this correspondence has already been requested to be placed on PSC central files, but if you require a further copy please do not hesitate to contact Nick Lutt (Environmental Consultant, Thames Water) on 07747 640438 or email nick.lutt@thameswater.co.uk.

If you have any queries concerning the application, please do not hesitate to contact Nick Lutt directly. His full contact details are included in application form Part A.

Yours sincerely
