As explained below I have attached the second batch of surveys from 2012-2013.

Please let me know if it covers what you need.

I have attached a table below which hopefully addresses the additional queries regarding point 2 Schedule 5 notice [No.1].

Apologies for the missing information in the schedule 5 [No.1] request. We have asked our consultants to investigate this and it appears that an error was made in uploading the data, the missing surveys are from 2012 and 2013. I need to send these in two batches due to size. The first one is attached. I will send the second shortly.

With regards to point number 2, Cefas have provided a key of terms used in 'Data Manipulation Workbooks\Cefas 2014\_2017\TR339 Data compilation workbook Cefas 2014-2017.xlsx'shown below. Hopefully this will be of assistance.

fldCruiseName	Sizewell Impingement programme (CIMP) followed by sampling year
fldCruiseStationNumber	Sequential station number, resets to 0 at the start of each new CIMP year
fldValidityCode	Sample validity <b>Valid (V)</b> – valid data used in calculations <b>Invalid (I)</b> – often occurs when the bulk sample overflows, data not used in calculations <b>Additional (A)</b> – deviation to normal sampling procedure, the data is valid, but may not be used in the final calculations
fldGearCode	Internal gear code 302040102 – hourly sample 302040203 – 18 hr bulk sample
fldGearAdditional1	Sampling date (start of visit) used to identify different surveys
fldGearAdditional2	Number of operational drum screens
fldPrimeStation	Prime stations Hourly samples (1-6) Bulk (7)
fldDateTimeShot	Date and time sample commenced
fldDateTimeHaul	Date and time sample ended
fldTowDuration	Sample duration (minutes)

Following the responses we received to the first Schedule 5 [No.1] notice on 03/11/2020, my colleagues have begun their review of the submissions.

To date they have identified some issues for which we either require missing data/information to be provided, or clarification to be provided on certain points relating to the original response. We have provided specifics on what is required in points **1)** and **2)** below:

---

**1) Missing data/information that is required to be provided as part of the first Schedule 5 notice [No.1] response**

Report TR339 (ver 3) states that 128 Pisces surveys were undertaken. However, in the folder '\Raw data\Pisces' only 114 spreadsheets have been provided. Each spreadsheet appears to relate to a single survey. This suggests data from 14 surveys have been omitted from the Schedule 5 notice response.

We therefore require that the missing data/information (14 surveys) is provided to allow us to undertake a complete assessment of the first Schedule 5 notice response. We have attached a list of the 114 spreadsheet files we received in your Schedule 5 notice response within the attachment (SZC WDA permit – Sch 5 [No.1] – Filelist for query 1.txt) in case this assists your team in identifying the missing data. Comparison with table 3 in TR339 suggests the missing surveys are from 2012 and 2013.

**2) Points requiring clarification following initial review of the first Schedule 5 notice [No.1] response**

In 'Data Manipulation Workbooks\Cefas 2014\_2017\TR339 Data compilation workbook Cefas 2014-2017.xlsx', please can you clarify the following points:

- a) Please provide an explanation of what each of the field names mean, for example 'fldGearAdditional1'
- b) It appears that field 'fldGearAdditional1' is a unique identifier that may be used to distinguish between surveys, please can you confirm if this is the case?

---

Please let me know if you have any queries regarding the above.
